Good afternoon,

Thank you for notifying SAHRA of the proposed development. Please note that all development applications are processed via our online portal, the South African Heritage Resources Information System (SAHRIS) found at the following link: <http://sahra.org.za/sahris/>.

Please create an application on SAHRIS and upload all documents pertaining to the Environmental Authorisation Application Process. As per section 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA), an assessment of heritage resources must form part of the process and the assessment must comply with section 38(3) of the NHRA.

Once all documents including all appendices are uploaded to the case application, please ensure that the status of the case is changed from DRAFT to SUBMITTED. Please ensure that all documents produced as part of the EA process are submitted as part of the application, and are submitted to SAHRA at the beginning of the Public Review periods. Once all these documents have been uploaded, I will be able to issue an informed comment as per section 38(4) and 38(8) of the NHRA.

Kind regards,

Please find attached general requirements for works at or near Eskom infrastructure. The proposed portions is bounded by the Eskom traction line next to the railway line on the north-eastern side. Although the mining will be underground, Eskom and other infrastructure must be safeguarded against possible ground collapse as well as underground fire risks.

Attachments: Eskom requirements for work in or near Eskom servitudes mining exploration.doc

Please find attached general requirements for works at or near Eskom infrastructure. The proposed portions is bounded by the Eskom traction line next to the railway line on the north-eastern side. Although the mining will be underground, Eskom and other infrastructure must be safeguarded against possible ground collapse as well as underground fire risks.

Dear Me. Van de Giessen

SUBJECT: THE MTPA COMMENTS ON THE SCOPING REPORT FOR THE EXTENTION OF THE MINING AREAS FOR THE PROPOSED KALABASFONTEIN PROJECT, FORZANDO COAL MINES (PTY) LTD ON PORTIONS OF THE FARM KALABASFONTEIN 232 IS AND POR. 7 OF THE FARM UITGEDACHT 229 IS, NEAR KRIEL IN MPUMALANGA PROVINCE. MINING RIGHT 380 MR & 381 MR.

With reference to your correspondence reference EIMS ref: 1244 of date 6 July 2018 our comments:

The MTPA has no objection against the proposal and the authorisation of the EA providing that the following ecological sensitivities are acknowledged and managed.

1. Included is figure 1, a Mpumalanga Biodiversity Sector Plan Map (MBSP 2014) that indicates the sensitive grasslands of the Eastern Highveld Grassland areas marked as CBA irreplaceable (red) and CBA optimal (yellow) .
2. The Figure 2 is a Freshwater assessment map that indicates the Ecological Support Area wetlands.

The MTPA recommends that the following studies are done in order to identify, avoid and mitigate the negative impacts on the sensitive ecological areas:

1. Ecological study which focus on the Conservation important species such as Protected plants and bird species and in particular the Grass owl and the critical endangered ,

3. Hydropedology.
4. Post mining land capability.
5. Rehabilitation program and the Mitigation hierarchy.
6. Adequate financial provision for water purification after decommissioning.

Detailed plans to manage the negative impacts are required.
Impacts such as:

1. Downstream decanting of AMD,
2. Spilling of pollution control facilities,
3. Dewatering of wetlands.
4. Subsidence.

MTPA strongly support the active purification of dirty water and release of clean water into the natural wetland and river systems for at least a hundred years after closure. Close monitoring of water quality during the mining phase and for a very long period thereafter must take place

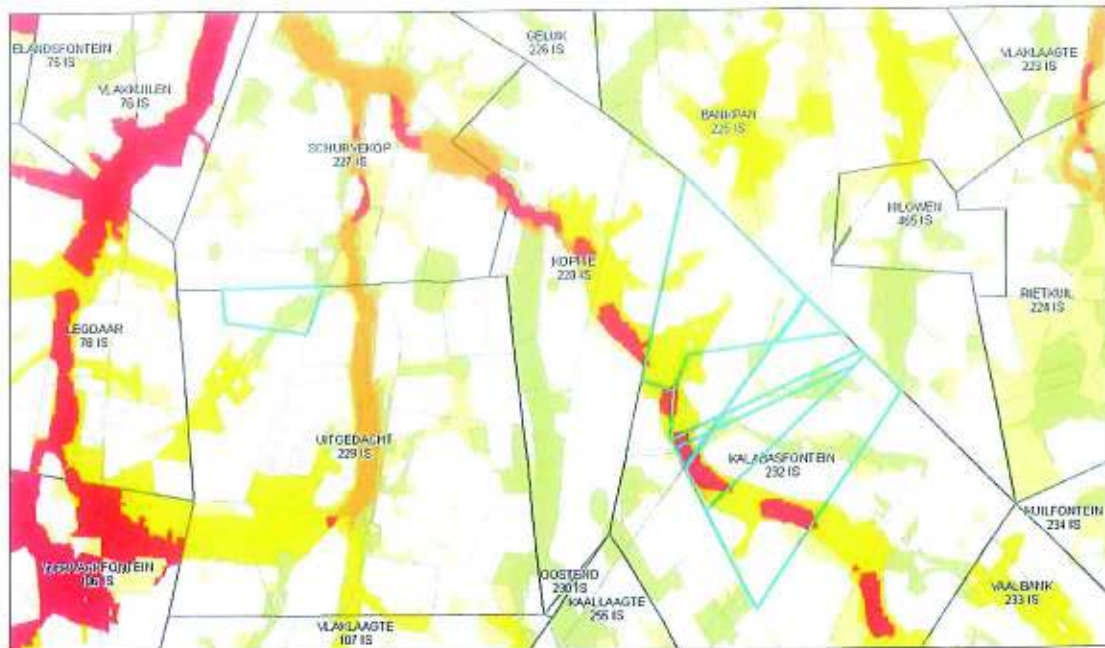

Rehabilitation should not focus only on the post-mining landform design but should include a comprehensive freshwater flow plan and indigenous re-vegetation and bioremediation of the rehabilitated areas. All exotic plant invaders should be removed from the site.

Your cooperation will be appreciated.

Kind Regards

.....
MR. J.J.EKSTEEN
MANAGER SCIENTIFIC SERVICES
DATE: 3 August 2018

MBSP figure 1. The terrestrial CBA irreplaceable and optimal areas on the farm Kalabasfontein 232 IS.

Dear Me. Van de Giessen

SUBJECT: THE MTPA COMMENTS ON THE SCOPING REPORT FOR THE EXTENSION OF THE MINING AREAS FOR THE PROPOSED KALABASFONTEIN PROJECT, FORZANDO COAL MINES (PTY) LTD ON PORTIONS OF THE FARM KALABASFONTEIN 232 IS AND POR. 7 OF THE FARM UITGEDACHT 229 IS, NEAR KRIEL IN MPUMALANGA PROVINCE. MINING RIGHT 380 MR & 381 MR.

With reference to your correspondence reference EIMS ref: 1244 of date 6 July 2018 our comments:

The MTPA have no objection to the proposal and the authorisation of the EA provided that the following ecological sensitivities are acknowledged, impacts minimised and managed.

1. Figure 1 below shows a map of our Critical Biodiversity Areas (MBSP 2014) that indicates the sensitive grasslands of the Eastern Highveld Grassland areas marked as CBA Irreplaceable (red) and CBA Optimal (yellow).
2. Figure 2 is a Critical Biodiversity Areas map showing the freshwater priorities.

The MTPA recommends that the following studies are conducted in order to identify, avoid and mitigate the negative impacts on the sensitive ecological areas:

1. Consideration and application of the mitigation hierarchy.
2. Ecological studies which focus on finding and identifying species of conservation importance such as threatened plant and bird species, and in particular the Grass owl and the critical endangered, Albertina Sisulu ground orchid (*Brachycorythis conica* subsp *transvaalensis*) that are listed for this area.
3. Wetland delineation and consideration of the hydrogeology.

4. Potential impacts on ecological infrastructure, such as dewatering of wetlands, and the likely impacts on their functioning.
5. Rehabilitation program that considers the use of indigenous vegetation and bioremediation measures.
6. Adequate financial provision for water purification after decommissioning.

In addition, detailed plans to manage the negative impacts are also required. These include:

1. Downstream decanting of AMD and its impacts over time,
2. Spilling of pollution control facilities,
3. Subsidence.

The MTPA support the active purification of dirty water and release of clean water into the natural wetland and river systems for at least a hundred years after closure. Frequent monitoring of water quality during the mining phase and for a considerable period thereafter must take place.

Rehabilitation should not only focus on the post-mining landform design but should also consider a comprehensive freshwater flow and management plan and indigenous re-vegetation and bioremediation of the disturbed areas. All exotic plant invaders should be removed from the site.

Your cooperation will be appreciated.

Kind Regards

Dr. M.C. Lötter

Dear Ms. Cheyenne Muthukarapan

I write to Kalabasfontein Project today with a hope of building a new business partnership. A Partnership between our two firms will be able to collectively capitalize on prime opportunities in the industry over the next coming years. PRET has worked well with established companies to spearhead new opportunities for our youth.

As Chairman of PRET. I am responsible for providing the visionary leadership for our organisation and the youth around Bethal.

I look forward to scheduling a meeting at your earliest convenience to discuss details.

Regards,

Fiki Masilela

Chief General

Good day Nadia,

I have just received a telephone call from our client at Exarro. He would like to ask if the meeting could please be moved to Tuesday next week (24 July) as something has come up for Monday and he is unable to be in Pretoria then. The time can be moved to earlier if this would be more suitable (i.e. 09:00). Please advise if this would be suitable.

Please also confirm that the meeting will be at your offices in Lyttelton.

Should you have any queries, please do not hesitate to contact me.

BY E-MAIL: kalabasfontein@eims.co.za

Dear Ms Muthukarapan,

**RE: ENVIRONMENTAL LICENCING PROCESSES FOR THE KALABASFONTEIN PROJECT
IN THE MSUKALINGWA LOCAL MUNICIPALITY, MPUMALANGA PROVINCE**

We refer to the abovementioned and confirm that we act on behalf of AFGRI Agri Services herein, who is an interested and affected party.

We further refer to the notification regarding the opportunity to participate in the environmental licencing processes for the Kalabasfontein Project in the Msukalingwa Local Municipality, Mpumalanga Province that you send to our client on 20 June 2018.

Kindly find attach hereto the interested and affected parties registration form that we completed and sign. Kindly send all future communication and documentation to our offices.

Kindly also indicate when you are available for a meeting with our offices regarding the abovementioned matter.

We trust you find the above in order and await your reply.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Nadia Hetzel', written in a cursive style.

Good Morning Mr Mtswei,

I trust this email finds you well. I have attached the project Background Information Document and Questionnaire to this email for your consideration.

Could you please advise me if you have a list of occupiers and contact details for the project area (ie. Farm Kalabasfontein) for inclusion on the project I&AP database? Alternatively, is there a way you can inform the occupiers about the project and ask them to contact EIMS.

I will give you a call later today to discuss.

Should you have any comments or queries please feel free to contact me.

Warm regards,

Dear Ms. Mudziri,

Thank you for your correspondence regarding the Kalabasfontein Project Public Meeting. Kindly find attached the presentation from the public meeting for your perusal. Please note that the minutes from the meeting are currently being drafted however, the main concerns raised at the meeting included jobs and the potential impact on water.

I will forward you the minutes as soon as they are finalised.

Should you have any further comments or queries please do not hesitate to contact me.

Warm regards,

MS. CHEYENNE
MUTHUKARAPAN

Good day Ms Muthukarapan

Reference is made to the subject titled project. apologies for failing to attend yesterday, this was forwarded to me at a very short notice and as such I encountered challenges with travel arrangements. I am therefore asking for minutes of yesterday's meeting, so I can use them together with the report which I will get from your website so as to enable me to comment.

Thanks and

Warm Regards,

With reference to the above mentioned application the applicant is advised to: consider /address the following when compiling the report.

1. Compliance with Conservation of Agricultural Resources Act, 1983 (Act 43 of 1983).
2. The Act makes provision for the Conservation of the Natural Agricultural Resources of South Africa through:
 - o Maintaining the production of land
 - o Combating and preventing of erosion
 - o Preventing the weakening or destruction of the water sources,
 - o Protecting of the vegetation.
 - o Combating of weeds and invader plants
3. Detailed soil study for all the farms / properties as well as sensitive areas that will be negatively impacted by the project.
4. A detailed rehabilitation plan to be implemented during and after completion of the project
5. Pre and post land use on the properties to be affected by the project.
6. Mitigation measures to be applied in order to minimize the negative impact.
7. Consider soils / lands with low to poor potential for the project

Page No: 1

Interim Comment

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Forzando Coal Mines (Pty) Ltd

Forzando Coal Mines (Pty) Ltd wishes to extend the current mining activities at Forzando South underground coal mines (under Mining Right MR380) by inclusion of contiguous areas which are held under Prospecting Rights 1035PR and 1170PR. The proposed extension does not intend to develop new surface infrastructure. There will be a need for two new ventilation shafts at the Forzando South mining area.

The Kalabasfontein Project extent of the proposed new mine areas is around 15,478,296m² and underground mining will consist of bord and pillar methods 22 m below surface level. This mine is located on the farm Kalabasfontein 232 IS, in the Msukaligwa Local Municipality of the Mpumalanga Province.

Environmental Impact Management Services (Pty) Ltd is undertaking a Scoping and Environmental Impact Assessment (S&EIA) process on behalf of Forzando Coal Mines (Pty) Ltd, in respect of listed activities in the Environmental Impact Assessment (EIA) Regulations 2017, that require an application for Environmental Authorisation in terms of the National Environmental Management Act, 1998 (NEMA), a Water Use Licence in terms of the National Water Act, 36 of 1998, and the amendment of the mine works programme in terms of section 102 of the Mineral and Petroleum Resources Development Act, 2002 (MPRDA) (As amended). A BID document has been submitted to SAHRA in terms of section 38(8) of the National Heritage Resources Act, 25 of 1999 for commenting.

In terms of the National Heritage Resources Act, no 25 of 1999 (NHRA), heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years, structures older than 60 years are generally protected. They may not be disturbed without a permit from the relevant heritage resources authority. In contexts of development applications, the developer must ensure that no heritage resources will be impacted by the proposed development, by lodging an application to SAHRA and submitting detailed development specifications as a notification of intent to develop. If the application is made in terms of s. 38 (8) of the NHRA then it is incumbent on the developer to ensure that a Heritage Impact Assessment (HIA) is undertaken, as s. 38(2)a does not apply. Such a study should follow the SAHRA 2007 impact assessment guidelines and section 38(3).

It is noted that a Heritage Impact Assessment and Palaeontological Impact Assessment of the proposed

For attention: Ms. Cheyenne Muthkarapan

**ENVIRONMENTAL SCOPING REPORT FOR PUBLIC REVIEW
KALABASFONTEIN MINING RIGHT APPLICATION**

Your reference: 1244

Your email dated 20 June 2018 and EIMS Environmental Scoping Report for public review dated 6 July 2018 have relevance.

National roads R38 and R35 are affected.

Given that underground mining is employed, SANRAL in principle has no objection to the approval of the Environmental Scoping Report and extension of the mining rights, subject to the following:

A traffic impact assessment (specialist study), prepared by a registered traffic engineer, must be submitted to Mr. Izak van der Linde (email vdlindei@nra.co.za tel 012 426 6213) of SANRAL for approval. The scope of the traffic impact study must include traffic analysis (existing and additional heavy vehicle traffic movements generated) at intersections of national road R38 and access roads to both Forzando Coal North and South operations at respectively GPS coordinates -26.276523, 29.597698 and -26.323712, 29.561843 (including investigating eliminating of existing staggered intersections and conversion thereof to four-legged intersections). The scope of the traffic impact assessment also to include the R35 intersection at GPS coordinates -26.327127, 29.457737 (capacity and safety improvements). The photo below show possible illegal movement of heavy vehicle at the R35 intersection right turning into opposing traffic.

The destination of the coal produced by Forzando Coal must also be clarified.

Yours faithfully

 13/8/2018
