

List of Properties including Coordinates

The development footprint sizes vary due to the nature of this application. Upgrades to existing instream structures as well as new instream structures are scattered throughout the catchment. Furthermore, the peripheral interventions (rehabilitation of adjacent open space) depends on the extent of waste removal, vegetation rehabilitation, etc. As such, the area for each intervention cannot be provided at this stage.

Below is a table containing a list of properties affected by the various wetland rehabilitation activities.
