

mineral resources

Department:
Mineral Resources
REPUBLIC OF SOUTH AFRICA

1

APPLICATION FORM FOR ENVIRONMENTAL AUTHORISATIONS IN TERMS OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 AND THE NATIONAL ENVIRONMENTAL MANAGEMENT WASTE ACT, 2008 IN RESPECT OF LISTED ACTIVITIES THAT HAVE BEEN TRIGGERED BY APPLICATIONS IN TERMS OF THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (MPRDA) (AS AMENDED).

IMPORTANT NOTICE

Kindly note that:

1. As from 8 December 2014, this document serves as the application form, and incorporates the requisite documents that are to be submitted together with the application for the necessary environmental authorisations in terms of the said Acts.
2. This application form is applicable while the Mineral and Petroleum Resources Development Amendment Act of 2008 is in effect, as the form may require amendment should the Act be further amended.
3. Applicants are required to apply for the necessary water use licence and any other authorisations or licences to the relevant competent authorities as required by the relevant legislation. Upon acceptance of an application for a right or permit in terms of the MPRDA, applicants will be required to provide evidence to the Regional Manager that a water use licence has been applied for.
4. The Regional Manager will respond to the application and provide the reference and correspondence details of the Competent Authority, and in the event that the application for a right or permit is accepted, together with the date by which the relevant environmental reports must be submitted. Notwithstanding anything that may appear to be stated to the contrary in the acceptance letter, the timeframes are in fact aligned and the prescribed timeframes for the submission of documents as regulated by the NEMA regulations must be strictly adhered to.
5. The application must be typed within the spaces provided in the form. The sizes of the spaces provided are not necessarily indicative of the amount of information to be provided. Spaces are provided in tabular format and will extend automatically when each space is filled with typing.
6. The failure to submit complete information as required in this application form may result in the refusal of the application for an environmental authorisation and consequently of the right or permit applied for.
7. This application must be submitted through the SAMRAD online application system of the Department of Mineral Resources under "Other documents to upload".
8. Unless protected by law, all information filled in on this application form will become public information on receipt by the competent authority. Any interested and affected party should and shall be provided with the information contained in this application on request, during any stage of the application process.
9. Please note that an application fee is payable in terms of the National Environmental Management Act and the National Waste Management Act, which fees must be paid upon lodgement of the application. Should the said application fees not be paid as prescribed the application for a right or permit in terms of the Mineral and Petroleum Resources Development Act cannot be considered to have been made in the prescribed manner and the said

application for a right or permit will have to be rejected. In this regard the type of applications must be identified in the table below.

PLEASE STATE TYPE OF AUTHORISATIONS BEING APPLIED FOR.

APPLICATION TYPE	APPLICABLE FEE	Mark with an X where applicable
NEMA S&EIR application on its own	R10 000.00	<input type="checkbox"/>
NEMA BAR application on its own	R 2 000.00	<input type="checkbox"/>
NEMWA S&EIR application on its own	R10 000.00	<input type="checkbox"/>
NEMWA BAR application on its own	R 2 000.00	<input type="checkbox"/>
NEMA S&EIR application combined with NEMWA S&EIR application	R 15 000.00	<input checked="" type="checkbox"/>
NEMA BAR application combined with NEMWA BAR application	R 3 000.00	<input type="checkbox"/>
NEMA S&EIR application combined with NEMWA BAR application	R 11 000.00	<input type="checkbox"/>

1. CONSULTATION BASIC ASSESSMENT AND/ OR SCOPING REPORT

This is an application for mine expansion (including NEMA Part 2 amendments) requiring a NEMA S&EIR.

Tshedza Mining Resources (Pty) Ltd (Tshedza) a subsidiary of Mbuyelo Coal (Pty) Ltd. has an approved Mining Right (MR) (Ref No: MP 30/5/1/2/2/297 MR) and Environmental Management Programme (EMPR), in terms of the Minerals and Petroleum Resources Development Act (Act 28 of 2002, as amended) (MPRDA), for the mining of coal at Manungu Colliery. The existing and approved mining operations are situated on portions 5, 6, 7, 8 and 9 of the farms Weilaagte 271 IR, situated in the Victor Khanye Local Municipality within the Nkangala District Municipality (Mpumalanga Province). The mine has been in operation since mid-2015. Tshedza wishes to expand the mining operations to extend the life of mine (LOM) until approximately FY 2040/2041. The proposed areas within which the expansion of mining operations would take place, are all within the existing approved mining right boundary, however these areas were not specifically included and assessed in the previous Environmental Impact Assessment (EIA) and Water Use Licence Application (WULA).

2. DETAILS OF THE APPLICANT

Project applicant:

Tshedza Mining Resources (Pty) Ltd.

Registration no (if any):

2005/035542/07

Trading name (if any):

N/A

Responsible Person, (e.g. Director, CEO, etc.):	Hentie Hoffmann		
Contact person:	Martha Mokonyane		
Physical address:	No 2 Robin Close Infinity Office Park Block A Cnr Michelle and' Hennie Alberts Street Meyersdal 1448		
Postal address:	PO Box 90349 Bertsham Johannesburg		
Postal code:	2013	Cell:	
Telephone:	+27 11 867 0836	Fax:	+27 11 867 0520
E-mail:	martham@mbuyelo.com		

3. ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) INFORMATION

EAP:	Adri Joubert		
Professional affiliation/registration:	SACNASP: 400336/11		
Contact person (if different from EAP):	Same as EAP		
Company:	Geo Soil and Water (Pty) Ltd		
Physical address:	15A Midas Avenue, Olympus, Pretoria, 0081		
Postal address:	Postnet Suite C319, Private Bag X18, Lynnwood Ridge, 0040		
Postal code:	0040	Cell:	082 926 8460
Telephone:	+27 (82) 926 8460	Fax:	-
E-mail:	adri@geosoilwater.co.za		

If an EAP has not been appointed please ensure that an independent EAP is appointed as stipulated by the NEMA Regulations, prior to the commencement of the process.

The declaration of independence and the Curriculum Vitae (indicating the experience with environmental impact assessment and relevant application processes) of the EAP must also be attached as **Appendix 1**.

4. PROJECT DESCRIPTION

Farm Name:	The existing Mining Right (Ref No: MP 30/5/1/2/2/297 MR) covers the farms Weilaagte 271 IR (all portions) and Welgevonden 272 IR (all portions)
-------------------	---

Application area (Ha)	All of the properties within the Manungu Colliery <u>Mining Right Area</u> cover ~5000 hectares and Tshedza is planning to extend the current NEMA approved mining area to include an additional ~600 hectares (inclusive of open cast and underground mining) within the existing mining right boundary. The existing NEMA EA (NEAS Ref No: MPP/EIA/0000665/2012 granted on 9 March 2014 - Ref: 17/2/3N-266) only covers Portions 5, 6, 7, 8 and 9 of the farm Weilaagte 271 IR.
Magisterial district:	Nkangala District
Distance and direction from nearest town	Manungu Colliery is situated approximately 60 km southwest of Witbank, ~10 km south of Delmas and ~16 km north-west of Devon.
21-digit Surveyor General Code for each farm portion	This environmental authorisation application covers the following farm portions: TOIR00000000027100001 TOIR00000000027100003 TOIR00000000027100004 TOIR00000000027100005 TOIR00000000027100006 TOIR00000000027100007 TOIR00000000027100008 TOIR00000000027100009 TOIR00000000027100012 TOIR00000000027200001 TOIR00000000027200002 TOIR00000000027200003 TOIR00000000027200004 TOIR00000000027200006 TOIR00000000027200010 TOIR00000000027200011 TOIR00000000027200012 TOIR00000000027200016 TOIR00000000027200017 TOIR00000000027200018 TOIR00000000027200019
Locality map	Please find Locality attached as Appendix 2.
Description of the overall activity. (Indicate Mining Right, Mining Permit, Prospecting right, Bulk Sampling,	A Mining Right (MP 30/5/1/1/2/297MR) was granted to Tshedza Mining Resources (Pty) Ltd (Tshedza) on the 4 th of May 2009 for the mining of coal on all portions of the farms Weilaagte 271 IR and Welgevonden 272 IR. In addition, Tshedza was issued an Environmental Authorisation (EA), Licence No 17/2/2N-266, in terms of the National Environmental Management Act, 1998 (Act 107 of 1998) (NEMA) and the

<p>Production Right, Exploration Right, Reconnaissance permit, Technical co-operation permit, Additional listed activity)</p>	<p>Environmental Impact Assessment Regulations, 2010 (Regulations), on the 19th of March 2014, by the Mpumpalanga Department of Economic Development, Environment and Tourism (MDEDET). An Integrated Water Use Licence (IWUL) for Section 21 (a), (c), (g), (i) and (j) water uses in terms of chapter 4 of the National Water Act (Act 36 of 1998) was granted for water uses associated with opencast mining on the 23rd of February 2015 (License No 04/B20A/ACGIJ/2621). <u>The current approved EA and IWUL only covers portions 5, 6, 7, 8 and 9 of the farm Weilaagte 271 IR.</u> The mine has been in operation since mid-2015 and the estimated Life of Mine (LOM) is planned for approximately 30 years. In order to extend the mining operations outside of the current approved EA and IWUL (i.e.: outside of the approved portions of land), further EA and IWUL authorisation are required (hence this application).</p> <p>In addition to the expansion of the mining operations, amendments to certain existing conditions are being applied for to align the conditions with the current and proposed future works. These NEMA Part 2 amendments will be incorporated into this S&EIR process.</p> <p>In order to enhance the quality of the coal product (beneficiation of product), Tshedza wishes to incorporate a wash plant into their current crushing and screening plant. The inclusion of the wash plant will necessitate an amendment to the existing Mine Works Programme (MWP) as well as an amendment to the existing approved EMPR which will be undertaken through this EIA application process.</p>
--	---

5. ACTIVITIES TO BE AUTHORISED

(Please provide copies of Environmental Authorisations obtained for the same property as **Appendix 3**).

(For an application for authorisation indicated. Please note that for a project that involves more than one listed activity that, together, make up one development proposal, all the listed activities pertaining to this application must be included. Please note that any authorisation that may result from this application will only cover activities specifically applied for). (Attach a proposed site plan, drawn to a scale acceptable to the competent Authority, showing the location of all the activities to be applied for, as **Appendix 2**)

Name of activity	Aerial extent of the activity	Listed Activity	Applicable listing notice	Waste management authorisation
(E.g. For prospecting - drill site, site camp, ablution facility, accommodation, equipment storage, sample storage, site office, access route etc...etc...etc	Ha or m ²	(Mark with an X where		(Indicate whether an authorisation

6. PUBLIC PARTICIPATION

(Provide details of the public participation process proposed for the application as required by Regulation.

Details of the Public Participation process to be followed.

6.1.1. IDENTIFICATION OF INTERESTED AND AFFECTED PARTIES TO BE CONSULTED

IDENTIFICATION CRITERIA	Mark with an X where applicable	
	<u>YES</u>	<u>NO</u>
Will the landowner be specifically consulted?	X	

Will the lawful occupier on the property other than the Landowner be consulted?	X	
Will a tribal authority or host community that may be affected be consulted?	X	
Will recipients of land claims in respect of the area be consulted?	X	
Will the landowners or lawful occupiers of neighbouring properties been identified?	X	
Will the local municipality be consulted?	X	
Will the Authority responsible for power lines within 100 metres of the area be consulted?	X	
Will Authorities responsible for public roads or railway lines within 100 metres of the area applied for be consulted?	X	
Will authorities responsible for any other infrastructure within 100 metres of the area applied for be consulted?	X	
Will the Provincial Department responsible for the environment be consulted?	X	
Will all of the parties identified above be provided with a description of the proposed mining /prospecting operation as referred above?	X	
Will all the parties identified above be requested in writing to provide information as to how their interests (whether it be socio-economic, cultural, heritage or environmental) will be affected by the proposed mining project?	X	
Other, Specify		

6.1.2. DETAILS OF THE ENGAGEMENT PROCESS TO BE FOLLOWED

Steps to be taken to notify interested and affected parties (Describe the process to be undertaken to consult interested and affected parties including public meetings and one on one consultations. NB the affected parties must be specifically consulted regardless of whether or not they attended public meetings. Photographs of notice boards, and copies of advertisements and notices notifying potentially interested and affected parties of the proposed application must be attached as Appendix 4).	PROVIDE DESCRIPTION HERE
	<p>Interested and Affected Parties (I&AP's) have been notified of the project via registered letters, emails and facsimiles including distribution of a BID. Site notices and posters have been placed in and around the application area. Two separate initial notification 30-day commenting periods have been undertaken for this project due to amendments to the scope of work following the first notification. The initial project plan was to only include a wash plant into the existing plant area however following consultation, it was identified that the cumulative impacts of mining should be considered. As such, the proposed mine expansion now caters for the 30-year life of mine.</p> <p>The initial notifications included a questionnaire requesting comment on the proposed project. Site notices have been placed in and around the proposed expansion application area; in addition, newspaper advertisements were placed in the newspapers which are widely distributed in the area and advertisements were placed in the provincial Government Gazettes. The public participation process has been, and will</p>

	<p>continue to be, undertaken in accordance with the NEMA process and the 2014 Regulations. I&AP's have been provided two (2) initial notification and call to register period of 30 days each. The scoping report will be made available for public review and comment for a period of 30 days, within the prescribed timeframes following submission of this Application Form. A further period of 60 days will be provided to I&AP's to comment on the EIA/EMPR during that phase of the application process. The 60 days will ensure that the Water Use Licence technical report (that will form part of the EIA report) complies with the consultation requirements as specified in the NWA GNR 267.</p> <p>The information submitted by I&AP's via any form will be utilised during the Impact Assessment and compilation of the Scoping and EIAR/EMPR.</p>
<p>Information to be provided to Interested and Affected Parties.</p>	<p>Compulsory</p> <ul style="list-style-type: none"> • The site plans. • List of activities to be authorised. • Scale and extent of activities to be authorised. • Typical impacts of activities to be authorised. • The duration of the activity. • Sufficient detail of the intended operation to enable them to assess what impact the activities will have on them or on the use of their land. <p>Other, specify:</p> <ul style="list-style-type: none"> • The purpose of the proposed project. • Details of the affected properties (including parent farm and portion). • Details of the MPRDA and NEMA Regulations that must be adhered to. • The activities being applied for. • Date by which comment, concerns and objections must be submitted. • Contact details of the Environmental Assessment Practitioner (EAP).
<p>Information to be required from Interested and Affected Parties.</p>	<p>Compulsory</p> <ul style="list-style-type: none"> • To provide information on how they consider that the proposed activities will impact on them or their socio-economic conditions. • To provide written responses stating their suggestions to mitigate the anticipated impacts of each activity.

	<ul style="list-style-type: none"> • To provide information on current land uses and their location within the area under consideration. • To provide information on the location of environmental features on site to make proposals as to how, and to what standard, the impacts on site can be remedied. • To mitigate the potential impacts on their socio-economic conditions to make proposals as to how the potential impacts can be managed, avoided or remedied.
	<p>Other, Specify:</p> <ul style="list-style-type: none"> • Details of the landowner and information on lawful occupiers. • Details of any communities existing within the area. • Details of any Tribal Authorities within the area. • Details of any other I&AP's that need to be notified. • Details on any land developments proposed. • Details of any perceived impacts to the environment that should be considered in the Scoping and EIAR. • Any specific comments, concerns or objections to the proposed mining expansion project.

7. DESCRIPTION OF THE ASSESSMENT PROCESS TO BE UNDERTAKEN

ITEM	DESCRIPTION
<p>Environmental attributes. Describe how the Environmental attributes associated with the development footprint will be determined.</p>	<p>For Scoping, the description of the existing status of the current receiving environment will be compiled through desktop data, available GIS information as well as from recent monitoring reports and available information from the existing mine. This will be updated in the EIA phase once detailed specialist investigations have been completed.</p>

<p>Identification of impacts and risks. (Describe the process that will be used to identify impacts and risks.</p>	<p>The identification of potential impacts and risks for assessment will be undertaken through I&AP consultation and the development of an in depth understanding of the activities, actions and processes to be undertaken on site based on the EAP's experience with similar projects as well as input from specialists. As such, the potential impacts and risks on broad environmental aspects, in respect of each of the main project actions, activities and processes will be assessed during the Scoping and EIA process.</p> <p>The impact assessment methodology to be used is guided by the requirements of the NEMA EIA Regulations. The broad approach to the significance rating methodology is to determine the environmental risk (ER) by considering the consequence (C) of each impact (comprising Nature, Extent, Duration, Magnitude, and Reversibility) and relate this to the probability/likelihood (P) of the impact occurring. This determines the environmental risk. In addition, other factors, including cumulative impacts, public concern, and potential for irreplaceable loss of resources, are used to determine a prioritisation factor (PF) which is applied to the ER to determine the overall significance (S).</p>
<p>Consideration of alternatives. Describe how alternatives, and in particular the alternatives to the proposed site layout and possible alternative methods or technology to be applied will be determined.</p>	<p>The identification and assessment of alternatives is a key component to the success of any EIA process. Essentially, alternatives represent different means of meeting the general purpose and need of the proposed project through the identification of the most appropriate method of development. Two levels of alternative screening will be investigated and considered which culminate into the identification of the feasible development alternative. The first level alternatives include land use, location, mining method, etc. These alternatives will determine the optimal placement and process for the proposed mining operation. After these viable alternatives have been assessed (if any), the level two alternatives; including technology, phasing and site layout alternatives will be considered in order to ensure the best practicable option is proposed for the activity.</p>
<p>Process to assess and rank impacts. Describe the process to be undertaken to identify, assess and rank the impacts and risks each individual activity.</p>	<p><u>Method of Assessing Impacts:</u></p> <p>The impact assessment methodology is guided by the requirements of the NEMA EIA Regulations. The broad approach to the significance rating methodology is to determine the <u>environmental risk (ER)</u> by considering the <u>consequence (C)</u> of each impact (comprising Nature, Extent, Duration, Magnitude, and Reversibility) and relate this to the <u>probability/likelihood (P)</u> of the impact occurring. This determines the environmental risk. In addition, other factors, including cumulative impacts, public concern, and potential for irreplaceable loss of resources, are used to determine a <u>prioritisation factor (PF)</u> which is applied to the ER to determine the overall <u>significance (S)</u>.</p> <p><u>Determination of Environmental Risk:</u></p>

The significance (S) of an impact is determined by applying a prioritisation factor (PF) to the environmental risk (ER).

The environmental risk is dependent on the consequence (C) of the particular impact and the probability (P) of the impact occurring. Consequence is determined through the consideration of the Nature (N), Extent (E), Duration (D), Magnitude (M), and reversibility (R) applicable to the specific impact.

For the purpose of this methodology the consequence of the impact is represented by:

$$C = (E+D+M+R) \times N$$

4

Each individual aspect in the determination of the consequence is represented by a rating scale as defined in Table 1.

TABLE 1: CRITERIA FOR DETERMINING IMPACT CONSEQUENCE

Aspect	Score	Definition
Nature	- 1	Likely to result in a negative/ detrimental impact
	+1	Likely to result in a positive/ beneficial impact
Extent	1	Activity (i.e. limited to the area applicable to the specific activity)
	2	Site (i.e. within the development property boundary),
	3	Local (i.e. the area within 5 km of the site),
	4	Regional (i.e. extends between 5 and 50 km from the site)
	5	Provincial / National (i.e. extends beyond 50 km from the site)
Duration	1	Immediate (<1 year)
	2	Short term (1-5 years),
	3	Medium term (6-15 years),
	4	Long term (the impact will cease after the operational life span of the project),
	5	Permanent (no mitigation measure of natural process will reduce the impact after construction).
Magnitude/ Intensity	1	Minor (where the impact affects the environment in such a way that natural, cultural and social functions and processes are not affected),

	2	Low (where the impact affects the environment in such a way that natural, cultural and social functions and processes are slightly affected),
	3	Moderate (where the affected environment is altered but natural, cultural and social functions and processes continue albeit in a modified way),
	4	High (where natural, cultural or social functions or processes are altered to the extent that it will temporarily cease), or
	5	Very high / don't know (where natural, cultural or social functions or processes are altered to the extent that it will permanently cease).
	Reversibility	1
	2	Impact is reversible without incurring significant time and cost.
	3	Impact is reversible only by incurring significant time and cost.
	4	Impact is reversible only by incurring prohibitively high time and cost.
	5	Irreversible Impact

Once the C has been determined the ER is determined in accordance with the standard risk assessment relationship by multiplying the C and the P (refer to). Probability is rated/scored as per Table 2.

Table 2: Probability Scoring

Probability	1	Improbable (the possibility of the impact materialising is very low as a result of design, historic experience, or implementation of adequate corrective actions; <25%),
	2	Low probability (there is a possibility that the impact will occur; >25% and <50%),
	3	Medium probability (the impact may occur; >50% and <75%),
	4	High probability (it is most likely that the impact will occur- > 75% probability), or
	5	Definite (the impact will occur),

The result is a qualitative representation of relative ER associated with the impact. ER is therefore calculated as follows:

$$ER = C \times P$$

Table 3: Determination of Environmental Risk

Consequence	5	5	10	15	20	25
	4	4	8	12	16	20
	3	3	6	9	12	15
	2	2	4	6	8	10
	1	1	2	3	4	5
		1	2	3	4	5
	Probability					

The outcome of the environmental risk assessment will result in a range of scores, ranging from 1 through to 25. These ER scores are then grouped into respective classes as described in Table 4.

Table 4: Significance Classes

Environmental Risk Score	
Value	Description
< 9	Low (i.e. where this impact is unlikely to be a significant environmental risk),
≥9; <17	Medium (i.e. where the impact could have a significant environmental risk),
≥ 17	High (i.e. where the impact will have a significant environmental risk).

The impact ER will be determined for each impact without relevant management and mitigation measures (pre-mitigation), as well as post implementation of relevant management and mitigation measures (post-mitigation). This allows for a prediction in the degree to which the impact can be managed/mitigated.

Impact Prioritisation:

Further to the assessment criteria presented above it is necessary to assess each potentially significant impact in terms of:

- Cumulative impacts; and
- The degree to which the impact may cause irreplaceable loss of resources.

In addition, it is important that the public opinion and sentiment regarding the development and consequent potential impacts is considered in the decision-making process. In an effort to ensure that these factors are considered, an impact prioritisation factor (PF) will be applied to each impact ER (post-mitigation). This prioritisation factor does not aim to detract from the risk ratings but rather to focus the attention of the decision-making authority on the higher priority/significance issues and impacts. The PF will be applied to the ER score based on the assumption that relevant suggested management/mitigation measures are implemented.

Table 5: Criteria for Determining Prioritisation

Public response (PR)	Low (1)	Issue not raised in public response.
	Medium (2)	Issue has received a meaningful and justifiable public response.
	High (3)	Issue has received an intense meaningful and justifiable public response.
Cumulative Impact (CI)	Low (1)	Considering the potential incremental, interactive, sequential, and synergistic cumulative impacts, it is unlikely that the impact will result in spatial and temporal cumulative change.
	Medium (2)	Considering the potential incremental, interactive, sequential, and synergistic cumulative impacts, it is probable that the impact will result in spatial and temporal cumulative change.
	High (3)	Considering the potential incremental, interactive, sequential, and synergistic cumulative impacts, it is highly probable/definite that the impact will result in spatial and temporal cumulative change.
Irreplaceable loss of resources (LR)	Low (1)	Where the impact is unlikely to result in irreplaceable loss of resources.
	Medium (2)	Where the impact may result in the irreplaceable loss (cannot be replaced or substituted) of resources but the value (services and/or functions) of these resources is limited.

High (3)

Where the impact may result in the irreplaceable loss of resources of high value (services and/or functions).

The value for the final impact priority is represented as a single consolidated priority, determined as the sum of each individual criteria represented in **Table 5**. The impact priority is therefore determined as follows:

$$\text{Priority} = \text{PR} + \text{CI} + \text{LR}$$

The result is a priority score which ranges from 3 to 9 and a consequent PF ranging from 1 to 2 (Refer to Table 6).

Table 6: Determination of Prioritisation Factor

Priority	Ranking	Prioritisation Factor
3	Low	1
4	Medium	1.17
5	Medium	1.33
6	Medium	1.5
7	Medium	1.67
8	Medium	1.83
9	High	2

In order to determine the final impact significance, the PF is multiplied by the ER of the post mitigation scoring. The ultimate aim of the PF is to be able to increase the post mitigation environmental risk rating by a full ranking class, if all the priority attributes are high (i.e. if an impact comes out with a medium environmental risk after the conventional impact rating, but there is significant cumulative impact potential, significant public response, and significant potential for irreplaceable loss of resources, then the net result would be to upscale the impact to a high significance).

Table 7: Final Environmental Significance Rating

Environmental Significance Rating	
Value	Description
< -10	Low Negative (i.e. where this impact would not have a direct influence on the decision to develop in the area),
≥ -10 < -20	Medium Negative (i.e. where the impact could influence the decision to develop in the area),
≥ -20	High Negative (i.e. where the impact must have an influence on the decision process to develop in the area).
< 10	Low Positive (i.e. where this impact would not have a direct influence on the decision to develop in the area),
≥ 10 < 20	Medium Positive (i.e. where the impact could influence the decision to develop in the area),

	≥ 20	High Positive (i.e. where the impact must have an influence on the decision process to develop in the area).	
<p>Contribution of specialist reports</p> <p>Describe how specialist reports, if required, will be taken into consideration and inform the impact identification, assessment and remediation process.</p>	<p>Several EIA-phase specialist studies have been undertaken to address the key issues. The specialist studies involved the gathering of data relevant to identifying and assessing environmental impacts that may occur as a result of the proposed project. These impacts were then assessed according to pre-defined rating scales. Specialists also recommended appropriate mitigation / control or optimisation measures to minimise potential negative impacts or enhance potential benefits, respectively. The following specialist studies have been conducted:</p> <ul style="list-style-type: none"> • Hydrological assessment; • Hydropedology assessment; • Geohydrology assessment; • Biodiversity, soils and wetlands assessment; • Heritage and paleontological assessment; • Air quality assessment; • Closure cost assessment; and • Waste Classification. <p>All specialists were required to adhere to the the EAPs method of assessing impacts, as detailed above. The specialist studies will inform the EIA phase assessment (EIAR/EMPR) with input into the sensitivity mapping.</p> <p>It is crucial to note that the Sensitivity Mapping is to be used as a first level mechanism to provide guidance (where viable) regarding design and layout and identify operational alternatives for further assessment. In addition, the mapping exercise allows the identification of certain spatial characteristics which may not be compatible or desirable for the purpose of infrastructure placement as well as (where possible) circumnavigating potential fatal flaws.</p>		
<p>Determination of impact management objectives and outcomes.</p> <p>Describe how impact management objectives will be determined for each activity to address the potential impact at source, and how the</p>	<p>The objectives of the impact management measures shall be to firstly anticipate and avoid risks and impacts. This shall be accomplished through the adoption of a risk and impact assessment process which aims to identify all relevant environmental and social risks and receptors that are likely to be affected by such risks and impacts, including the issues identified by I&AP's during the consultation process. The impact and risk identification process shall take into consideration each activity and its associated potential impacts. The impact management objectives will be incorporated into and EMPR. The EMPR developed for the project shall include mechanisms whereby social and environmental risk and impacts shall be avoided and mitigated. The objectives of this environmental management framework shall be:</p>		

<p>impact management outcomes will be aligned with standards.</p>	<ul style="list-style-type: none"> • To anticipate potential risks and impacts associated with each activity pre-emptively through the implementation of risk assessment techniques and early warning systems such as environmental monitoring and inspections; • To develop and implement preventative measures to ensure known risks and impacts are addressed at source wherever possible (e.g. spill prevention procedures); • To implement detailed management measures to ensure that where avoidance of impacts is not possible, mitigation measures are in place to minimize impacts to workers, affected landowners/occupiers/communities, and the environment; and • To provide a framework for adaptive environmental management within the EMPR whereby impacts from unplanned events or incidents caused by the project may be effectively controlled to minimise impacts to workers, affected landowners/occupiers/communities, and the environment. <p>The management and mitigation measures shall be developed in accordance with applicable standards and guidelines, which may include, but is not limited to:</p> <ul style="list-style-type: none"> • Legislated Standards (e.g.: air quality guidelines and standards); • South African National Standards (SANS) (e.g.: SANS water quality standards); • Where Applicable, International Standards and Guidelines; • Applicable National and Regional Frameworks (e.g.: Bioregional Plans; Spatial Development Frameworks, National Protected Area Expansion Strategy Focus Areas, Environmental Management Frameworks, etc.); • Applicable Guidelines developed by authorities (e.g.: DMR guidelines, NEMA EIA guidelines); and • Other Applicable guidelines (e.g.: Mining and Biodiversity Guidelines). <p>To ensure that the impact management outcomes can be monitored, and performance evaluated, performance targets and indicators shall be developed where appropriate. Compliance and alignment with the prescribed standards shall be measures against the defined Performance Targets and Indicators through the implementation of a system of inspections and compliance monitoring as defined in the EMPR.</p>
---	--

8. OTHER AUTHORISATIONS REQUIRED

LEGISLATION	Mark with an X where applicable			
	AUTHORISATION REQUIRED		APPLICATION SUBMITTED	
	YES	NO	YES	NO
SEMA s				
National Environmental Management: Air Quality Act		X		X

National Environmental Management: Biodiversity Act		X		X
National Environmental Management: Integrated Coastal Management Act		X		X
National Environmental Management: Protected Areas Act		X		X
National Environmental Management: Waste Act	X		X	
National legislation				
Mineral and Petroleum Resources Development Act	X		X	
National Water Act	X			X
National Heritage Resources Act		X		X
Others: Please specify		X		X

Please provide proof of submission of applications in Appendix 5¹.

In the event that an authorization in terms of the National Environmental Waste Management Act is required for any of the activities applied for please state so clearly in order for such an authorisation to be considered as part of this application.

Please take note that the applicability of the following Acts listed below will be confirmed during the EIA Phase of the project:

- National Environmental Management: Biodiversity Act (particularly relating to permit applications for the removal/relocation of potential protected species identified on site); and
- National Heritage Resources Act (particularly relating to potential heritage features and archaeological finds).

Should it be found that any listed activities within these Acts will be triggered; the necessary permit and license application process will be followed at a reasonable time in accordance with the regulations. As far as possible, the intended outcome of the EIA and EMPR is to prevent the impacts relating to the above-mentioned legislation.

A MPRDA S102 amendment process is being undertaken by the mine, as well an EA process. This will be undertaken through an EIA to assess any new impacts associated with the change in the extent of the approved mining area. The Section 102 amendment will include the following:

- Revised Mine Works Programme to include wash plant; and
- Revised consolidated EMPR to include wash plant and expansion of the mining area.

9. DRAFT EMPR

For consultation purposes, provide a high-level approach to the management of the potential environmental impacts of each of the activities applied for.

¹ All applications are captured by this application. Applications to DWS to be completed once final EIA report is ready for submission.

ACTIVITIES (E.g. For prospecting - drill site, site camp, ablution facility, accommodation, equipment storage, sample storage, site office, access route etc...etc...etc E.g. for mining,- excavations, blasting, stockpiles, discard dumps or dams, Loading, hauling and transport, Water supply dams and boreholes, accommodation, offices, ablution, stores, workshops, processing plant, storm water control, berms, roads, pipelines, power lines, conveyors, etc...etc...etc.)	PHASE (of operation in which activity will take place). State; Planning and design, Pre-Construction' Construction, Operational, Rehabilitation, Closure, Post closure.	SIZE AND SCALE² (of Disturbance) (volumes, tonnages and hectares or m ²)	TYPICAL MITIGATION MEASURES (Eg, storm water control, dust control, noise control, access control, rehabilitation etc..., etc...,)	COMPLIANCE WITH STANDARDS (A description of how each of the recommendations herein will comply with any prescribed environmental management standards or practices that have been identified by Competent Authorities)
Excavations	Construction / operation	~300 ha	Rehabilitation, avoidance of high sensitivity areas, dust and noise control	The typical mitigation measures recommended will comply with all prescribed environmental management standards and practices.
Blasting	Construction / operation	500m radius from blast point	Noise control, health and safety	
Residue Stockpiles	Operation	Depends on height of stockpiles – to be assessed in	Dust control, avoidance of sensitive areas, Height control	

² The size and scale of disturbance is a rough estimated at this stage. More accurate estimates will be provided during the EIA phase.

		the EIA phase.	
Discard Dump	Operation	Depends on height of dump – to be assessed in the EIA phase.	Contamination control measures, avoid sensitive areas, erosion control
Wash Plant	Operation	~1500 m ²	Contamination control measures
Fuel storage	Operation	<1000 m ²	Contamination control measures
Power Line, roads, & pipelines	Operation	~2-3ha	Avoidance of sensitive areas
Additional infrastructure (relocation of contractors camp, workshop etc)	Operation	~3-5ha	Avoidance of sensitive areas
Water Treatment Facility	Operation	Unknown at this stage – to be confirmed in the EIA phase.	Avoidance of sensitive areas, monitoring, groundwater modelling
Pollution Control Dam	Operation	~25 000m ²	Water and salt balance update, stormwater management
Social issues	All phases	N/A	Compensation protocols

10. CLOSURE PLAN

<p>In the space provided under each heading below, please provide a high-level description of the plan for closure and the information that will be provided in the draft EMPR accompanying the draft basic assessment report or environmental impact reports going forward.</p>	
<p>Baseline environment Describe how the baseline environment will be</p>	<p>The baseline environment will be assessed in two phases namely:</p> <ul style="list-style-type: none"> Phase 1: Scoping & Sensitivity Mapping; and

<p>determined with the input of interested and affected parties and due cognizance of the current land uses and or existing biophysical environment</p>	<ul style="list-style-type: none"> • Phase 2: Environmental Impact Assessment (EIA) and Integrated Environmental Management Programme (IEMPR) <p>Phase 1: Scoping:</p> <p>This will require a detailed desktop investigation by the EAP to familiarise themselves with the proposed application area and broadly determine the existing status quo of the receiving environment.</p> <p>The Scoping Report will conform to the requirements of the previously mentioned Acts and include the following:</p> <ul style="list-style-type: none"> • A description of the receiving environment; • Identification and description of anticipated impacts; • Identify and describe reasonable land use or development alternatives; • A description of the process used to engage I&AP's and other Stakeholders; • A high-level impact assessment with the inclusion of preliminary mitigation measures; and • A description of further investigations required in the EIA (Plan of Study). <p>Review of the report by I&AP's and submission of the report to the authorities will conclude Phase 1.</p> <p>Phase 2: Integrated Environmental Impact Assessment (IEIA) and Environmental Management Programme (EMPR):</p> <p>During the EIA phase of the project, a more detailed investigation will be undertaken for the likely disturbance footprint. On completion of the EIA level assessments, the EAP will begin compilation of the EMPR. The IEIA and EMPR will include the following information:</p> <ul style="list-style-type: none"> • A detailed description of the receiving environment; • A description of the Public Participation Process methodology; • A record of the findings of the Public Participation Process; • An Environmental Impact Assessment (EIA) during all project phases; • An Environmental Management Programme (EMPR) during all project phases; • Closure and Rehabilitation Plans; • Calculation of the Financial Provisions; • A detailed description of the need and desirability of the proposed activity including advantages and disadvantages that the activity will have to the environment and community; • A description of the methodology used in determining significance of identified impacts; • A description and comparative assessment of all alternatives identified; • A summary of the findings and recommendations of any Specialist Studies;
---	--

	<ul style="list-style-type: none"> • A description of all identified impacts and an assessment of the significance of each impact before and after implementation of proposed mitigation measures; • A description of assumptions, uncertainties and gaps in knowledge; • A recommendation as to whether the activity should be authorised and under what conditions; • An Environmental Impact Statement including key findings; • A draft Environmental Management Plan; and • Copies of any and all specialist studies carried out. <p>Each identified impact will be assessed for significance by investigating and ranking the nature, duration, extent, magnitude and probability of each impact. In addition to this the reversibility and the potential for irreplaceable loss of resources will also be assessed. In accordance with the requirements of the EIA regulations a Draft Environmental Management Programme (EMPR) will also be prepared.</p> <p>Following submission of the IEIA, Specialist Studies and Draft EMPR to the registered I&APs for review and comment, the final submission will be made to the DMR.</p> <p>Public Participation Process:</p> <p>The Public Participation Process (PPP) will be robust and continue to engage interested and affected parties (IAPs) throughout the all phases of the project. As a result of the public notifications, a register will be opened and maintained which will record all contact details of persons whom have submitted written comments or responded to the notification and who have requested that they be registered as IAPs. All registered IAPs will be informed of the required process of involvement as defined by the EIA regulations. All objections and representations received from IAPs will be collected and considered in this application. Responses will be prepared and distributed to those IAPs who submitted comments and/or objections. These comments /objections and responses will be recorded in an Issues and Responses Report (IRR) for inclusion into the Scoping Report and EIA Report respectively. In addition, the registered IAPs will be given an opportunity to comment on all reports prepared to be submitted to the DMR.</p>
<p>Closure objectives Describe the closure objectives and the extent to which they will be aligned to the baseline environment</p>	<p>The EMPR shall include a closure and rehabilitation plan. The plan shall outline the closure objectives which are aimed at reinstating the landform, land use and vegetation units to the pre-mining land use or similar.</p> <p>Rehabilitate the land which was impacted by the mining activity and the related infrastructure to meet the closure objectives;</p> <ul style="list-style-type: none"> • Remove all infrastructure built in relation to the mining operations which will not be used by the landowners or a third party. Should it happen that the third party may want to use the infrastructure, appropriate arrangements should be made to ensure long term sustainable use of the infrastructure;

	<ul style="list-style-type: none"> • Follow a process of closure that is progressive and integrated into the short and longterm plans; • Assess the closure impacts proactively at regular intervals throughout project life; • Implement progressive rehabilitation measures, beginning during the construction phase wherever possible; • Monitor and manage water on site to minimise soil, surface/groundwater contamination; • Comply with national closure and rehabilitation regulatory requirements; • Form active partnerships with local communities to take management of the land after the project has ceased, where possible; and • Maintain and monitor all rehabilitated areas following re-vegetation. If monitoring shows that the objectives have been met, an application for closure can be made.
<p>Rehabilitation Plan</p> <p>Describe the scale and aerial extent of the prospecting or mining listed activities to be authorised, including the anticipated prospecting or mining area at the time of closure, and confirm that a site rehabilitation plan drawn to a suitable scale will be provided in the draft EMPR to be submitted together with the draft EIR or Basic Assessment Report as the case may be.</p>	<p>The extent of the proposed new open cast and underground mining areas is approximately 600 ha. A rehabilitation plan will be drawn to a suitable scale and provided in the EIAR.</p>

<p>Rehabilitation Cost</p> <p>Describe how the rehabilitation cost will be determined and provide a preliminary estimate thereof</p>	<p>Based on the feedback received from the DMR during the pre-application meeting, it was revealed that since Manungu Colliery is an existing mining operation, the DMR rates can be utilised to calculate the rehabilitation costs and that the NEMA Financial Provisioning Regulations will apply at a future date. The quantum for financial provision will be calculated using the DMR's preferred methodology and guideline document titled "Guideline Document for the Evaluation of the Quantum of Closure-Related Financial Provision Provided by a Mine (2005)" and the latest applicable Master Rates.</p> <p>The rehabilitation cost will be calculated in detail with input from the various specialists assigned to the project and will be subject to annual review. Furthermore, the rehabilitation cost will also be based on implementation of the management measures to be included in the EMPR and revised accordingly for inclusion into the EIA.</p>
<p>Decommissioning</p> <p>Considering that rehabilitation must take place upon cessation of an activity, describe when each of activities applied for will be rehabilitated in terms of either the cessation of the individual activity or the cessation of the overall prospecting/exploration or mining/production activity.</p>	<p>Decommissioning and closure will be described in detail in the EMPR.</p>

APPENDIX 1A
DECLARATION OF THE EAP

I, Adri Joubert, declare that –

General declaration:

- I act as the independent environmental practitioner in this application
- I will perform the work relating to the application in an objective manner, even if this results in views and findings that are not favourable to the applicant
- I declare that there are no circumstances that may compromise my objectivity in performing such work;
- I have expertise in conducting environmental impact assessments, including knowledge of the Act, Regulations and any guidelines that have relevance to the proposed activity;
- I will comply with the Act, Regulations and all other applicable legislation;
- I will take into account, to the extent possible, the matters listed in regulation 8 of the Regulations when preparing the application and any report relating to the application;
- I have no, and will not engage in, conflicting interests in the undertaking of the activity;
- I undertake to disclose to the applicant and the competent authority all material information in my possession that reasonably has or may have the potential of influencing - any decision to be taken with respect to the application by the competent authority; and - the objectivity of any report, plan or document to be prepared by myself for submission to the competent authority;
- I will ensure that information containing all relevant facts in respect of the application is distributed or made available to interested and affected parties and the public and that participation by interested and affected parties is facilitated in such a manner that all interested and affected parties will be provided with a reasonable opportunity to participate and to provide comments on documents that are produced to support the application;
- I will ensure that the comments of all interested and affected parties are considered and recorded in reports that are submitted to the competent authority in respect of the application, provided that comments that are made by interested and affected parties in respect of a final report that will be submitted to the competent authority may be attached to the report without further amendment to the report;
- I will keep a register of all interested and affected parties that participated in a public participation process; and
- I will provide the competent authority with access to all information at my disposal regarding the application, whether such information is favourable to the applicant or not
- all the particulars furnished by me in this form are true and correct;
- will perform all other obligations as expected from an environmental assessment practitioner in terms of the Regulations; and

- I realise that a false declaration is an offence in terms of regulation 71 of the Regulations and is punishable in terms of section 24F of the Act.

Disclosure of Vested Interest (delete whichever is not applicable)

- I do not have and will not have any vested interest (either business, financial, personal or other) in the proposed activity proceeding other than remuneration for work performed in terms of the Regulations;
- ~~I have a vested interest in the proposed activity proceeding, such vested interest being:~~

Skills and Competencies

Financial Management

- Prepare and plan for budgets
- Assist with cost forecasting
- Approve budget and manage costs
- Supply information for contractor Scope of Work
- Provide detailed information for Capital Investment Project's (NPV, IRR, etc.)
- Deliver savings
- Ensure Corporate Governance
- Ensure adherence to Financial Policies and Procedures

Customer Relations

- Manage relationships with key stakeholders
- Interact with customers

Environmental

- Manage Environmental Performance Reviews
- Review and authorise changes in accordance with the Management of Change process
- Manage the Continuous Improvement and promote the understanding, use and application of Environmental Management System
- Identify applicable legislative requirements that have an impact on the function
- Comply with Environmental, legislative and functional requirements
- Assist in the effective management of contractors
- Develop and assist in the reporting and investigation of Environmental Incidents
- Assist and develop Environmental Emergency Preparedness and Response within a function

Strategy

- Provide Strategic and Change Leadership to the Environmental Team
- Align Strategy to customer and business requirements
- Align Strategy to regional and global Environmental strategies

Environmental Legislation (Policies, Act and Regulations)

- Ensure compliance to Environmental Legislation
- Monitor and keep up to date with changes in Legislation
- Participate and influence development of Legislation

Policies, Procedures

- Develop Environmental Management Policies, Procedure, Standards, Protocols, Work Instructions, Codes of Practice, etc.

Audits

- Conduct and Manage Environmental Audits
- ISO 14001: 2004 (internal and external)
- Regulatory audits

Communication

- Liaise with internal and external stakeholders regarding Environmental issues

Reports

- Reports and Assessments: Scoping Reports, Environmental Impact Assessments, Environmental Management Programs/Plans, Basic Assessments, Mining Right Applications, Prospecting Right Applications, Water Use Licence Applications, Waste Licence Applications, Land use assessments, Infrastructure mapping, Specialist Report Review, Public Participation

Projects

- Manage the execution of Environmental projects

External Forums

- Participate in external Forums

New Business Development

- Manage the Environmental inputs related to new Business Development from inception, pre-feasibility, feasibility and implementation
- Manage the Environmental Risk of new Business Developments from inception, pre-feasibility, feasibility and implementation

Business Improvement

- Participate in Environmental Improvement Projects

People Management

- Lead and manage Geo Soil & Water
- Plan, organise and allocate work
- Conduct Performance and Talent Management Reviews
- Reward excellence and manage substandard performers
- Identify talent and manage individual careers

Gentlemen/Ladies

APPLICATION FOR A MINING RIGHT IN TERMS OF SECTION 22 OF THE MINERAL AND PETROLEUM RESOURCES DEVELOPMENT ACT, 2002 (ACT 28 OF 2002): THE FARMS WEILAAGTE 271 IR AND WELGEVONDEN 272 IR, SITUATED IN THE MAGISTERIAL DISTRICT OF DELMAS.

1. This serves to inform you that your abovementioned application for a mining right to mine **Coal (C)** in respect of the abovementioned property has been granted in terms of Section 23(1) of the abovementioned Act. The Regional Office will prepare the final copies of the right to be signed.
2. Take note that the Regional Manager will approve the relevant Environmental Management Programme and sign the right before **23 June 2009**.
3. Further note that in terms of Section 23(5) of the Act, the mining right comes into effect on the date on which the Environmental Management Programme is approved. In terms of Section 25(2)(b) mining activities must commence within one year of the effective date.
4. In light of the afore-going, you are requested to:
 - 4.1. Ensure that all outstanding matters regarding your application are finalized and that relevant documents are submitted to the Regional Office no later than 30 days prior to the date mentioned in paragraph 2 above, which outstanding matters include the submission of:
 - a. financial provision in an amount of R 89 199 862.02

- b. the particulars of your authorized representative who will sign the right,
- c. the particulars of the public notary, before whom the right must be signed,
- d. six copies of the final mining work programme,
- e. A diagram prepared by a surveyor **Seven (7) originals** in accordance with the requirements of the Mining Titles Registration Act and which shall indicate-
 - (i) the north point;
 - (ii) the scale to which the plan has been drawn;
 - (iii) the name, number registration division and portion of the farm or farms on which the relevant area is situated;
 - (iv) the shape of the relevant area in relation to the farm boundaries and co-ordinates points;
 - (v) the region in which the relevant farm is situated and;
 - (vi) be certified, approved signed and dated by the professional land surveyor, unless the Director General otherwise indicates.

f. Six (6) copies of the Social and Labour Plan

4.2. Please make arrangements for the public notary, authorized representative(s) of your company and a witness to be present and attend the signing of the mining right, the final date for which will be arranged once the aforesaid outstanding matters are verified and finalized.

5. Note further that in terms of section 25(2)(a), the signed/executed mining right must be lodged for registration at the Mineral and Petroleum Titles Registration Office, Pretoria, within 30 days as from the date of approval of the relevant environmental management programme.
6. Failure to comply may result in the withdrawal, suspension or cancellation of the right in question.

Yours faithfully

ADV SANDILE NOGXINA
DIRECTOR-GENERAL:

Dear Sir

APPLICATION FOR ENVIRONMENTAL AUTHORISATION: THE PROPOSED EIA LISTED ACTIVITIES WITHIN MANUNGU COLLIERY, VICTOR KHANYE LOCAL MUNICIPALITY, MPUMALANGA PROVINCE.

With reference to the abovementioned application, please be advised that the Department has decided to grant authorisation. The environmental authorisation and reasons for the decision are attached herewith.

In terms of Regulation 10(2) of the Environmental Impact Assessment Regulations 2010, you are instructed to notify all registered interested and affected parties, in writing and within 12 (twelve) days of the date of this letter, of the Department's decision in respect of your application. Such notification must comply with the requirements of Regulations 10(2)(a)-(d) and must draw the attention of registered interested and affected parties to the fact that an appeal may be lodged against the decision in terms of Chapter 7 of the EIA Regulations, 2010.

Your attention is drawn to Chapter 7 of the Regulations, which regulates appeal procedures. Should you wish to appeal any aspect of the decision, you must, *inter alia*, lodge a notice of intention to appeal with the MEC, within 20 days of the date of this letter, by means of one of the following methods:

By facsimile: (013) 766 4614

By post: Private Bag x 11215
Nelspruit
1200

17/2/3N-266

By hand: Building 4, No.7 Government Boulevard,
Riverside Park Extension
Nelspruit
1200

Should you decide to appeal, you must serve a copy of your notice of intention to appeal on all registered interested and affected parties as well as a notice indicating where, and for what period, the appeal submission will be available for inspection.

Yours sincerely,

A handwritten signature in black ink, appearing to be 'S.S. Maluleka'.

Environmental Authorisation

Application number: 17/2/3N-266

Holder of Authorisation: TSHEDZA MINING
RESOURCES (PTY) LTD

NEAS reference number: MPP/EIA/0000665/2013

Location of activity: ON PORTION 5, 6, 7, 8 AND 9
OF THE FARM WEILAAGTE
2711R

17/2/3N-266

1. Decision

The Department is satisfied on the basis of the information available to it and subject to compliance with the conditions of this environmental authorisation, that the applicant should be authorised to undertake the activity as specified below. Details regarding the basis on which the Department reached this decision are set out in Annexure 1.

2. Activities authorised

By virtue of the powers conferred on it by the National Environmental Management Act, 1998 (Act 107 of 1998) and the Environmental Impact Assessment Regulations 2010, the Department hereby authorises:

Tshedza Mining Resources (Pty) Ltd
PO Box 90349
Bertham
2013

Attention: Mr. Neel Shilubane
Tel no: 011 484 6004
Fax no: 011 642 9611

To undertake the following activity (hereafter referred to as "the activity"):

The proposed EIA listed activities within Manungu Colliery on Portion 5, 6, 7, 8 and 9 of the farm Weilaagte 271 IR and Welgevonden 272 IR within the Victor Khanye Local Municipality, Mpumalanga Province at the co-ordinates 26° 14.63197"S and 28° 41.232648"E, **Activity 11, 12 and 22 of Government Notice R544 of 18 June 2010.**

The activity will entail the following:

- Mining activities (opencast workings, dust suppression, dewatering of the pits, coal/overburden stockpiles and backfilling of the pits, soil stockpiles);
- Infrastructure (offices, change rooms, workshops, stores and other ancillary infrastructure);
- Roads;
- Water management infrastructure (trenches, berms and pollution control dam);
- Sewage treatment plant;
- Portable crusher

The granting of this environmental authorisation is subject to the conditions set out below.

3. Conditions of Authorisation

Scope of authorisation

- 3.1 Authorisation of the activity is subject to the conditions contained in this authorisation, which form part of the environmental authorisation and are binding on the holder of the authorisation.
- 3.2 The holder of the authorisation must ensure compliance with these conditions by any person acting on his or her behalf, including but not limited to, an agent, sub-contractor, employee or person rendering a service to the holder of the authorisation.
- 3.3 The activity which is authorised may only be carried out at the property indicated above.

17/2/3N-266

- 3.4 Any changes to, or deviations from, the project description set out in this authorisation must be approved, in writing, by the Department before such changes or deviations may be effected. In assessing whether to grant such approval or not, the Department may request such information as it deems necessary to evaluate the significance and impacts of such changes or deviations and it may be necessary for the holder of the authorisation to apply for further authorisation in terms of the regulations.
- 3.5 In the event that the impacts exceed the significance as predicted in the environmental impact report, authorisation may be suspended after proper procedures have been followed.
- 3.6 In the event of any dispute concerning the significance of a particular impact, the opinion of the Department in respect of its significance will prevail.
- 3.7 The Department may change or amend any of the conditions of this authorisation if, in the opinion of the Department, it is environmentally justified.
- 3.8 This activity must commence within a period of three (3) years from the date of issue. If commencement of the activity does not occur within that period, the authorisation lapses and a new application for environmental authorisation must be made in order for the activity to be undertaken.
- 3.9 The holder of this authorisation is responsible for compliance with the provisions for Duty of Care and Remediation of Environmental Damage contained in Section 28 of the National Environmental Management Act, 1998 (Act 107 of 1998).
- 3.10 This authorisation does not negate the holder of the authorisation, responsibility to comply with any other statutory requirements that may be applicable to the undertaking of the activity.

Appeal of authorisation

- 3.11 The holder of the authorisation must notify every registered interested and affected party, in writing and within twelve (12) days of the date of this decision, of the outcome of the application.
- 3.12 The notification referred to above, must –
- Specify the date on which the authorisation was issued;
 - Inform the interested and affected party of the appeal procedure provided for in Chapter 7 of the Regulations; and
 - Advise the interested and affected party to the manner in which the decision can be accessed;
 - Be published in the newspaper contemplated in Regulation 54(2)(c) and which newspaper was used for the placing of advertisements as part of the public participation process.

Management and monitoring of the activity

- 3.13 The Environmental Management Programme (EMPr) dated 13th December 2013 and submitted as part of the Basic Assessment Report is hereby approved and must be implemented and adhered to throughout the lifecycle of the activity.
- 3.14 The applicant must appoint an Environmental Control Officer (ECO) that will have the responsibility of monitoring and reporting on compliance with the conditions of this environmental authorisation as well as monitoring and reporting on the implementation of the approved EMPr.
- 3.14.1 The ECO must be appointed before the commencement of construction and the Department must be notified of such an appointment for communication purposes.
- 3.14.2 The ECO must oversee and monitor the success of all rehabilitation activities.
- 3.14.3 During the construction phase, the ECO must submit monthly compliance reports to the Department in writing and copy the applicant with such reports. Where applicable, the ECO may negotiate the required frequency for the submission of reports with the Department, which must be agreed to in writing by the Department.

17/2/3N-266

The reports must include a description of all activities on site, problems identified, transgressions noted and remedial action implemented. All reports must reflect the Department's reference number of the project on the cover page.

- 3.14.4 The ECO must maintain the following on site:
- A site diary
 - Copies of all reports submitted to the Department
 - A complaints' register of all environmental complaints regarding the proposed project and the remedies applied to such complaints
- 3.14.5 The ECO must remain employed until all rehabilitation measures as well as site clean-up are completed and the site is handed over to the applicant by the contractor for operation.
- 3.15 The holder of the authorisation must submit an environmental audit report to the Department upon completion of the construction and rehabilitation activities. The environmental audit report must be compiled by an independent environmental auditor and must indicate the date of the audit, the name of the auditor and the outcome of the audit in terms of compliance with the conditions of this authorisation as well as the requirements of the EMPr.
- 3.16 The Department retains the right to monitor and/ or inspect the proposed development during both construction and operational phases.

Commissioning and operation of the activity

- 3.17 Fourteen (14) days written notice must be given to the Department that the activity will commence. Commencement for the purposes of this condition includes site preparation. The notice must include a date on which it is anticipated that the activity will commence, and must include the name and contact details of the appointed ECO.
- 3.18 The Contractor must be familiar with and adhere to, any local by-laws and regulations regarding the generation of noise and hours of operation. If a construction crew is accommodated on site it must be in accordance with the local authority's (Municipality) by-laws.
- 3.19 Affected parties on or in the vicinity of the site, including in particular surrounding landowners and any official responsible for existing installations on the site, must be advised in advance of avoidable disturbances.
- 3.20 The Contractor must ensure that the construction crew attends an environmental briefing and training session presented by the ECO prior to commencing of site activities.
- 3.21 All Employees must undergo the necessary safety training and wear the necessary protective training clothing at all times.
- 3.22 The construction camp must be located on a level area at least 50m from any watercourse/riparian zones, and the Constructor must attend to the drainage of the campsite to avoid sheet erosion and/or stagnant water.
- 3.23 The design of water management facilities should include suitable erosion protection measures to ensure that downstream erosion is minimized.
- 3.24 Temporary ablution facilities i.e. chemical toilets must be provided for construction personnel for the duration of the construction
- 3.25 The ablution facilities must not be closer than 50m from any watercourse.
- 3.26 The chemical toilets must be emptied and maintained in a working order throughout the construction period.
- 3.27 No fire must be ignited with the intent to destroy the flora on site and surrounding properties.
- 3.28 The Contractor is responsible for ensuring that there is access to clean drinking water for all employees on site.
- 3.29 Construction work must be undertaken in demarcated and designated areas in order to avoid unnecessary disturbance to faunal habitat and potential displacement of fauna.

17/2/3N-266

- 3.30 Property owners and residents in close vicinity of the mine must be warned beforehand of any blasting activity.
- 3.31 Subsoil and hard overburden stockpiles must not exceed a height of 6m.
- 3.32 Dust suppressions must be conducted on a daily basis by making use of water carts.
- 3.33 There must be no discharges from the site without a Water Use License.
- 3.34 Excess water in the pit that interferes with mine operations and/or endangers the workplace must be removed (as per conditions of Water Use License)
- 3.35 Mixing of all chemicals and hazardous substances must take place on an impermeable surface
- 3.36 All discard materials produced during construction must be taken off site and deposited in an accredited landfill site.
- 3.37 A suitable leak proof container for the storage of oiled equipment must be established.
- 3.38 Fuels and flammable materials must be stored in suitably equipped storage areas complying with generated fire safety requirements, impervious materials are to be used in these storage areas to prevent contamination of the ground in the event of spillages and leaks.
- 3.39 Areas where construction activities are prohibited are referred to as No-Go areas and must be demarcated to ensure that environmentally sensitive areas are not impacted by the construction activities.
- 3.40 The contractor must ensure that there is always a supply of absorbent material readily available to absorb breakdown spills.
- 3.41 An integrated waste management approach must be used, based on the principles of waste avoidance, minimization, reduction, reuse and recycling of materials and containers for glass, paper, metals and plastics must be provided.
- 3.42 The contractor must prevent the pollution of surface as well as groundwater.
- 3.43 Water management for residue deposits and water management for surface activities must be in line with Best Practice Guidelines (DWA)
- 3.44 If any heritage resources of significance are exposed during the construction of the pollution control dam, the SAHRA must be notified and construction activities must cease immediately.

General

- 3.45 A copy of this authorisation must be kept at the property where the activity will be undertaken. The authorisation must be produced to any authorised official of the Department who requests to see it and must be made available for inspection by any employee or agent of the holder of the authorisation who works or undertakes work at the property.
- 3.46 Where any of the applicant's contact details change, including the name of the responsible person, the physical or postal address and/or telephonic details, the applicant must notify the Department as soon as new details become known to the applicant
- 3.47 The holder of this authorisation must notify the Department, in writing, within twenty-four (24) hours if any condition of this authorisation is not adhered to. Any notification in terms of this condition must be accompanied by reasons for the non-compliance
- 3.48 Non-compliance with a condition of this authorisation may result in criminal prosecution or other actions provided for in the National Environmental Management Act, 1998 and the regulations. 

17/2/3N-266

- 3.49 National government, provincial government, local authorities or committees appointed in terms of the conditions of this authorisation or any other public authority shall not be held responsible for any damages or losses suffered by the applicant or his successor in title in any instance where construction or operation subsequent to construction be temporarily or permanently stopped for reasons of non-compliance by the applicant with the conditions of authorisation as set out in this document or any other subsequent document emanating from these conditions of authorisation.

ENVIRONMENTAL AUTHORISATION APPROVED BY:

A handwritten signature in black ink, appearing to be 'S.S. Maluleka'.

MR. S.S. MALULEKA
CHIEF DIRECTOR: ENVIRONMENTAL SERVICES
DATE: 19.03.2014

17/2/3N-266

Annexure 1: Reasons for the Decision

1. Background

1.1 The applicant, Tshedza Mining Resources (Pty) Ltd, applied for authorisation to carry out the following activity:

The proposed EIA listed activities within Manungu Colliery on Portions 5, 6, 7, 8 and 9 of the farm Weillaagte 271 IR and Welgevonden 272 IR within Victor Khanye Local Municipality, Mpumalanga Province at the co-ordinates 26° 14.63197"S and 28° 41.232648"E, Activity 11, 12 and 22 of Government Notice R544 of 18 June 2010.

The activity will entail the following:

- Mining activities (opencast workings, dust suppression, dewatering of the pits, coal/overburden stockpiles and backfilling of the pits, soil stockpiles);
- Infrastructure (offices, change rooms, workshops, stores and other ancillary infrastructure);
- Roads;
- Water management infrastructure (trenches, berms and pollution control dam);
- Sewage treatment plant;
- Portable crusher.

1.2 The applicant appointed the following Environmental Assessment Practitioner (EAP) to undertake a basic assessment process:

Eco-Gain Consulting (Pty) Ltd
Private Bag X1
The Willows
0041

Contact person: Ms. Mariante Herbst
Tel: 082 313 0258
Fax: 086 617 8586
Email: mariante@ecogain.co.za

2. Information considered in making the decision.

In reaching its decision, the Department took the following into consideration:

- a) The information contained in the Basic Assessment Report and the EMPr.
- b) The objective and requirements of relevant legislation, policies and guidelines, including Section 2 of the National Environmental Management Act, 1998 (Act No. 107 of 1998); and
- c) The findings of the site visit undertaken by Okwethu-kuhle Fakude on 19th February 2014.

3. Key factors considered in making the decision.

All information presented to the Department was taken into account in the Department's consideration of the application. A summary of the issues which, in the Department's view, were of the most significance is set out below:

- a) The proposed project will benefit the greater Delmas area during the commencement of the mining operation at Manungu Colliery as it will result in the creation of a number of employment opportunities.
- b) The production and sale of coal will ensure a constant flow of foreign capital into South Africa and into the project region.
- c) There will be small, micro and medium enterprise development on the local communities and the surrounding areas in line with the duration of mining. 

17/2/3N-266

d) Infrastructure will development in the area.

4. Findings

After consideration of the information and factors listed above, the Department made the following findings:

- a) No significant detrimental environmental impacts are anticipated, should the mitigation measures stipulated in the Basic Assessment report and conditions of this environmental authorisation be implemented and adhered to.
- b) There were signs of cultural heritage significance (graves on site) discovered during the Heritage Impact Assessment, undertaken by Archaeons Culture and Cultural Resources Consultants but the mining activities will not be undertaken anywhere near the graves, however the graves must be fenced, to ensure that they are not impacted upon by the mining operations.

In view of the above, the Department is satisfied that, subject to compliance with the conditions contained in the environmental authorisation, the proposed activity will not conflict with the general objectives of integrated environmental management as laid down in Chapter 5 of the National Environmental Management Act, 1998 (Act No. 107 of 1998) and that any potentially detrimental environmental impacts resulting from the proposed activity can be mitigated for to acceptable levels. Authorisation is accordingly granted. ○

APPENDIX 4b
INITIAL NOTIFICATION LETTERS

20 July, 2018

Our ref: LW/BW/1177

To whom it may concern

Dear Sir or Madam:

**NOTIFICATION REGARDING OPPORTUNITY TO PARTICIPATE IN VARIOUS ENVIRONMENTAL LICENCING PROCESSES
FOR MBUYELO COAL'S MANUNGU COLLIERY IN THE VICTOR KHANYE LOCAL MUNICIPALITY, MPUMALANGA
PROVINCE**

Tshedza Mining Resources (Pty) Ltd. (hereafter referred to as 'Tshedza'), a subsidiary of Mbuyelo Coal (Pty) Ltd. has appointed Geo Soil and Water cc (GSW) as the Environmental Assessment Practitioner (EAP) to assist with undertaking the necessary authorisation and amendment processes for Manungu Colliery. In turn GSW has appointed Environmental Impact Management Services (EIMS) as well as various specialist sub-consultants to assist with compiling the necessary reports and undertaking the statutory consultation processes, in support of proposed new infrastructure, facilities and amendments to existing licences as described herein. Subsequent to the previous Environmental Impact Assessment (EIA) and associated public participation processes undertaken for this project, there have recently been material changes to the proposed mining areas which have resulted in the previous application having been withdrawn. A new application will be submitted in due course based on the revised mining areas. This notification forms part of the initial call to register as part of the new application process.

The existing Manungu Colliery is located approximately 9km south of the town of Delmas in Victor Khanye Local Municipality, within the Nkangala District Municipality, Mpumalanga Province, South Africa. The approved mining right (MR) comprises of all portions of the farms Weilaagte 271 IR and Welgevonden 272 IR. The proposed mining activities will occur on portions 5, 6, 7, 8 and 9 of the farm Weilaagte 271 IR and portions 1, 2, 3, 4, 6, 10, 11, 12, 14, 16, 17, 18, 19 and the remaining extent of the farm Welgevonden 272 IR. The below-mentioned activities will all occur within the existing mining right area. The geographic coordinates at the center of the site are approximately: 26°14'33.09" S and 28°41'28.22" E.

Notice is given in terms of Chapter 6 of the Environmental Impact Assessment (EIA) Regulations, 2014 (GN R. 982) promulgated under the National Environmental Management Act (Act 107 of 1998) (NEMA), of applications for Environmental Authorisation (EA) (i.e.: Scoping and Environmental Impact Report (S&EIR)), Integrated Water Use Licence (IWUL) and Waste Management Licence (WML) for the proposed new infrastructure and facilities as well as amendment applications to the existing EA/EMP and IWUL, on Manungu Colliery.

Tshedza wishes to expand their mining activities to accommodate an extended Life of Mine (LOM) plan based on currently quantified reserves which extends mining activities outside of the current NEMA, National Environmental Management Waste Act (NEMWA), and National Water Act (NWA) approved areas. All proposed mine expansion activities (e.g.: opencast and underground mining, stockpile areas, etc.) will be contained within the approved mining right boundary, and environmental approvals will be sought for various mining related activities.

As part of the application processes, Tshedza further intends to include the licencing of new boreholes for domestic consumption, a french drain system to complement the septic tank system and establish a coal processing facility (wash plant) in order to complement the existing beneficiation facility (crushing and screening plant). Furthermore, various options are to be considered to manage expected water volumes within the pollution control dam. As part of this application, various amendments to the existing EA/EMP as well as IWUL will also be applied for in order to align the specific conditions with the current status of the mine as well as to clarify certain conditions. Where relevant, a Section 102 amendment application will be undertaken in terms of the Mineral and Petroleum Resources Development Act (Act 28 of 2002).

As a potential Interested and Affected Party (I&AP), you are invited to register and comment on the project. All I&AP's whom have registered during the initial notification periods held during 2017-2018 for this project will remain registered moving forward. Should you have any comments or concerns regarding the project, or should you require any additional information, please contact EIMS telephonically, or in writing **by no later than the 20th of August 2018**, using the contact details below. Please include the project reference number (1177) in all correspondence. Furthermore, please note that only registered I&APs will be informed of any project information post this registration period. Background information relating to the project is available on the EIMS website (<http://www.eims.co.za/public-participation>).

20 July, 2018

Ons verwysing: LW / BW / 1177

Aan wie dit mag aangaan

Geagte Meneer of Mevrouw:

**KENNISGEWING AANGAANDE GELEENTHEID VIR DEELNAME AAN VERSKEIE OMGEWINGS LISENSIËRING PROSESSE
VIR DIE MBUYELO COAL MANUNGU STEENKOOLOGYN IN DIE VICTOR KHANYE PLAASLIKE MUNISIPALITEIT,
MPUMALANGA PROVINSIE**

Tshedza Mining Resources (Pty) Ltd. (hierna verwys as 'Tshedza'), 'n filiaal van Mbuyelo Coal (Pty) Ltd. Het Geo Soil and Water cc (GSW) as die Omgewingsbeoordelingspraktisyn (EAP) aangestel om te help met die uitvoering van die nodige magtiging en wysigings prosesse vir die Manungu Steenkoolmyn. Op sy beurt het GSW vir Environmental Impact Management Services (EIMS) asook verskeie spesialis sub-konsultante aangestel om te help met die opstel van die nodige verslae en die onderneming van die statutêre konsultasie prosesse, ter ondersteuning van die voorgestelde nuwe infrastruktuur, fasiliteite en wysigings aan bestaande lisensies soos hierin beskryf. Na afloop van die vorige omgewingsimpakstudie (EIA) en gepaardgaande publieke deelnameproses wat vir hierdie projek onderneem is, is daar onlangs wesenlike veranderinge aan die voorgestelde mynareas gemaak, met die dat die vorige aansoek onttrek is. 'n Nuwe aansoek sal betyds ingedien word, gebaseer op die hersiene mynareas. Hierdie kennisgewing vorm deel van die aanvanklike oproep om te registreer, as deel van die nuwe aansoekproses.

Die bestaande Manungu Steenkoolmyn is geleë ongeveer 9km suid van die dorp van Delmas in Victor Khanye Plaaslike Munisipaliteit in die Nkangala Distrik Munisipaliteit, Mpumalang Provinsie, Suid-Afrika. Die goedgekeurde mynreg (MR) bestaan uit alle gedeeltes van die plase Weilaagte 271 IR en Welgevonden 272 IR. Die voorgestelde myn aktiwiteite sal plaasvind op gedeeltes 5, 6, 7, 8 en 9 van die plaas Weilaagte 271 IR and gedeeltes 1, 2, 3, 4, 6, 10, 11, 12, 14, 16, 17, 18, 19 en die oorblywende uitbreiding van die plaas Welgevonden 272 IR. Die onder-genoemde aktiwiteite sal almal binne die bestaande mynreg area plaasvind. Die geografiese koördinate in die middel van die perseel is ongeveer: 26°14'33.09" S and 28°41'28.22" O.

Kennis geskied hiermee ingevolge Hoofstuk 6 van die Omgewingsimpakstudie (EIA) Regulasies, 2014 (GN R. 982) uitgevaardig kragtens die Wet op Nasionale Omgewingsbestuur (Wet 107 van 1998) (NEMA), van aansoeke vir Omgewingsmagtiging (EA) (dit wil sê: Omvangsbepaling en Omgewingsimpakverslag (S&EIR), Geïntegreerde Watergebruiklisensie (IWUL) en Afvalbestuurslisensie (WML) vir die voorgestelde nuwe infrastruktuur en fasiliteite asook wysiging aansoeke aan die bestaande EA/EMP en IWUL, vir die Manungu steenkoolmyn.

Tshedza wil hul mynbedrywighede uitbrei om hul verlengde mynlewe (LoM) plan, wat gebaseer is op huidige gekwantifiseerde reserwes, te akkommodeer. Die uitbreidingstrek buite die huidige NEMA, Wet op Nasionale Omgewingsbestuur: Afval Wet (NEMWA), en die Nasionale Waterwet (NWA) goedgekeurde areas. Alle voorgestelde myn uitbreidings aktiwiteite (bv.: oop groef en ondergrondse mynbou, ophoop gebiede, ens) sal binne die goedgekeurde mynbou regte grens behou word, en die omgewing goedkeurings sal aansoekj voorgedoen word vir verskeie mynbou-verwante aktiwiteite.

As deel van die aansoek prosesse, is Tshedza Mining Resources se voorneme om verder die lisensiëring vir nuwe boorgate in te sluit vir huishoudelike verbruik, asook 'n stapelriool stelsel om die septiese tenk stelsel aan te vul en om 'n steenkoolverwerkingsfasiliteit te vestig ten einde die bestaande veredelings fasiliteit (breek- en siftings aanleg) aan te vul. Verder, moet verskeie opsies oorweeg word om die verwagte water volumes binne die besoedelingsbeheerdam te bestuur. As deel van die aansoek, sal verskeie wysigings aan die bestaande EA / EMP asook IWUL aangewend word ten einde die spesifieke omstandighede in lyn met die huidige status van die myn te bring, asook om sekere kondisies

A Block 5 Fernridge Office Park, 5 Hunter Avenue, Ferndale, Randburg | PO Box 2083, Pinegowrie 2123, South Africa
T (011) 789-7170 | F (011) 787- 3059

te verduidelik. Waar van toepassing, sal 'n Artikel 102 wysiging aansoek gedoen word in terme van die Wet op die Ontwikkeling van Minerale en Petroleumhulpbronne (Wet 28 van 2002) (MPRDA).

As 'n potensiële Belangstellende en Geaffekteerde Party (I&AP) word u uitgenooi om te registreer en kommentaar te lewer oor die projek. Alle I&AP's wat geregistreer was gedurende die eerste kennisgewing periodes wat gehou was gedurende 2017-2018 vir hierdie projek, sal geregistreer bly soos die projek aanbeweeg. Indien u enige kommentaar of bekommernisse met betrekking tot die projek het, of indien u enige verdere inligting verlang, kan u EIMS telefonies of skriftelik kontak, teen **nie later as 20 Augustus 2018 nie**, met behulp van die onderstaande kontakbesonderhede. Sluit asseblief die projek verwysingsnommer (1177) in alle korrespondensie in. Verder, neem asseblief kennis dat slegs geregistreerde I&AP's in kennis gestel sal word van enige projek inligting na afloop van hierdie registrasie periode. Agtergrond informasie met betrekking tot hierdie projek is beskikbaar op die EIMS webtuiste (<http://www.eims.co.za/public-participation>).

APPENDIX 4d
SITE NOTICES AND PROOF OF PLACEMENT

ENVIRONMENTAL NOTIFICATION: ENVIRONMENTAL LICENSING PROCESSES AND OPPORTUNITY TO PARTICIPATE

Notice is given in terms of Chapter 6 of the Environmental Impact Assessment (EIA) Regulations, 2014 (GN R. 962) promulgated under the National Environmental Management Act (Act 107 of 1998) (NEMA), or applications for Environmental Authorisation (EA) (i.e.: Scoping and Environmental Impact Report (SEIR)), Integrated Water Use Licence (IWUL) and Waste Management Licence (WML) for the proposed new infrastructure and facilities as well as amendment applications to the existing EA/EIWP and IWUL, on Manungu Colliery.

Name of Applicant: Tshedza Mining Resources (Pty) Ltd. (a subsidiary of Mbuyelo Coal (Pty) Ltd.)

EIMS Reference Number: 1177

Existing Approved Mining Right Reference Number: MP 30/5/1122/297 MR

Nature of Activity: Tshedza wishes to expand their mining activities to accommodate an extended Life of Mine (LOM) plan based on current currently quantified reserves which extends outside of the current NEMA National Environmental Management Waste Act (NEMWA) and National Water Act (NWA) approved areas. All proposed mine expansion activities (e.g.: opencast and underground mining, stockpile areas, etc.) will be contained within the approved mining right boundary, and environmental approvals will be sought for various mining related activities.

As part of the application processes, Tshedza further intends to include the licensing of new boreholes for domestic consumption, a french drain system to complement the septic tank system and establish a coal processing facility (washing plant) in order to complement the existing beneficiation facility (crushing and screening plant). Furthermore, various options are to be considered to manage expected water volumes within the pollution control dam. As part of this application, various amendments to the existing EA/EIWP as well as IWUL will also be applied for in order to align the specific conditions with the current status of the mine as well as to clarify certain conditions. Where relevant, a Section 102 amendment application will be undertaken in terms of the Mineral and Petroleum Resources Development Act (Act 28 of 2002).

Subsequent to the previous Environmental Impact Assessment (EIA) and associated public participation processes undertaken for this project, there have recently been material changes to the proposed mining areas which have resulted in the previous application having been withdrawn. A new application will be submitted in due course based on the revised mining areas. This notification forms part of the initial call to register as part of the new application process.

Location: The existing Manungu Colliery is located approximately 9km south of the town of Deimos in Victor Khanye Local Municipality within the Nkangala District Municipality, Mpumalanga Province, South Africa. The approved mining right (MR) comprises of all portions of the farms Weilaage 271 IR and Welgevonden 272 IR. The proposed mining activities will occur on portions 5, 6, 7, 8 and 9 of the farm Weilaage 271 IR and portions 1, 2, 3, 4, 5, 10, 11, 12, 14, 16, 17, 18, 19 and the remaining extent of the farm Welgevonden 272 IR. The below-mentioned coordinates are approximately: 26°14'33.09" S and 28°41'28.22" E.

Registration and Comment: As a potential interested and affected party (I&AP), you are invited to register and comment on the project. All I&APs whom have registered during the initial notification periods held during 2017-2018 for this project will remain registered moving forward. Should you have any comments or concerns regarding the project, or should you require any additional information, please contact EIMS telephonically, or in writing by no later than the 20 August 2018, using the contact details below. Please include the project reference number (1177) in all correspondence. Furthermore, please note that only registered I&APs will be informed of any project information post this registration period.

OMGEWINGS KENNISGEWING: OMGEWINGS MAGTIGING EN LISENSIERINGS PROSESSE – GEELENTHEID VIR DEELNAME

Kennis geskied hiermee ingevolg met Hoofstuk 6 van die Omgewingsimpakstudie (EIA) Regulasies, 2014 (GN R. 962) uitgewerkte kragtigens die Wet op Nasionale Omgewingsbestuur (Wet 107 van 1998) (NEMA), van aansoek vir Omgewingsmagtiging (EA) (dit wil sê: Omgewingspaling en Omgewingsimpakverlag (SEIR)), Integreerde Watergebruiksinsensie (IWUL) en Afvalbestuursinsensie (WML) vir die voorgestelde nuwe infrastruktuur en fasiliteite asook wysiging aansoek om die bestaande EA / EMP en IWUL op Manungu steenkoolmyn

Naam van Aansoeker: Tshedza Mining Resources (Pty) Ltd. (n filiaal van Mbuyelo Coal (Pty) Ltd.)

EIMS Verwysingsnommer: 1177

Bestaande Goedgekeurde Myntreke Verwysingsnommer: MP 30/5/1122/297 MR

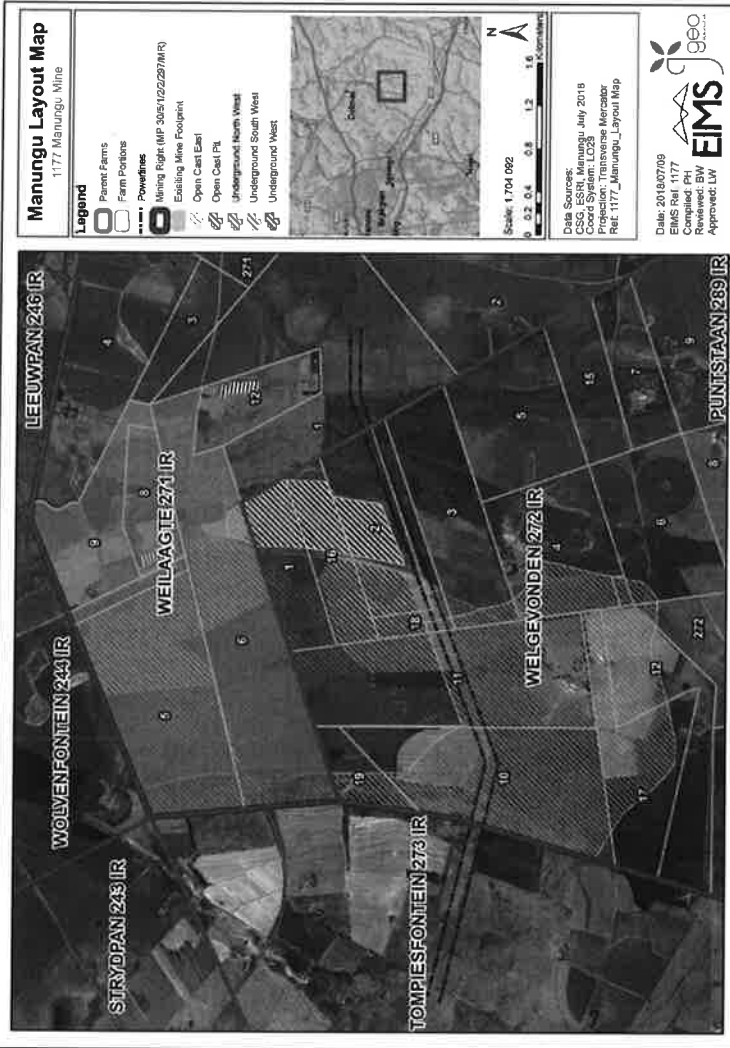

Aard van die Aktiviteit: Tshedza wil hul mynbedryfsgedede uitbrei om hul verlenings mynswa (LOM) plan, wat gebaseer is op huidige gekwantifiseerde reserves, te akkommodeer wat strek buite die huidige NEMA in te sluit. Wet op Nasionale Omgewingsbestuur Aival Wet (NEMWA) en die Nasionale Waterwet (NWW) goedgekeurde areas. Alle voorgestelde myn uitbreidings aktiviteite (bv., oop groei en ondergrondse mynbou, ophoop gebiede, ens) sal binne die goedgekeurde mynbou regie grens behou word, en die omgewing goedgekeurings sal aansoek voorgedoen word vir verskeie mynbou-gerelateerde aktiviteite.

As deel van die aansoekproses, is Tshedza Mining Resources se voorneme om verder die insensiering vir nuwe boorgate in te sluit vir huishoudelike gebruik, asook 'n stapelrooi stelsel om die spesifieke stelsel aan te vul en om 'n steekboorwerkingsfasiliteit te vestig (on einde die bestaande verdelings fasiliteit (break- on stighings aanleg) aan te vul. Verder, moet verskeie opsies oorweeg word om die verwagte water volumes binne die besoedelingbeheersdam te bestuur. 'n deel van die aansoek sal verskeie wysigings aan die bestaande EA / EMP asook IWUL aangewend word ten einde die spesifieke omstandighede in lyn met die huidige status van die myn te bring, asook om sekere kondisies te verduidelik. Waar van toepassing, sal 'n Artikel 102 wysiging aansoek gedoen word in terme van die Wet op die Ontwikkeling van Minerale en Petroleum hulpbronne (Wet 28 van 2002) (MPRDA).

Na afloop van die vorige omgewingsimpakstudie (EIA) en gepaardgaande publieke deelnameprosesse, wat vir hierdie projek onderneem is, is daar onlangse wesenlike veranderinge aan die voorgestelde mynareas gemaak, met die dat die vorige aansoek onttrek is. 'n Nuwe aansoek sal bysids ingedien word gebaseer op die hersele mynareas. Hierdie kennisgewing vorm deel van die aanvanklike oproep om te registreer, as deel van die nuwe aansoekproses.

Plak: Die bestaande Manungu Steenkoolmyn is geleë ongeveer 9km suid van die dorp van Deimos in Victor Khanye Plaaslike Munisipaliteit in die Nkangala Distrik Munisipaliteit, Mpumalanga Provinsie, Suid-Afrika. Die goedgekeurde mynreg (MR) bestaan uit alle gedeeltes van die plase Weilaage 271 IR en Welgevonden 272 IR. Die voorgestelde myn aktiviteite sal plaaslik op gedeeltes 5, 6, 7, 8 en 9 van die plase Weilaage 271 IR and gedeeltes 1, 2, 3, 4, 5, 10, 11, 12, 14, 16, 17, 18, 19 en die ooreblywende uitbreiding van die plase Welgevonden 272 IR. Die onder-geboende aktiviteite sal binne die bestaande mynreg area onder-geboende aktiviteite sal binne die bestaande mynreg area plaasvind. Die geografiese koördinate in die middel van die perseel is ongeveer: 26°14'33.09" S and 28°41'28.22" E.

Registrasie en Kommentaar: As 'n potensieel belangstellende en Geaffecteerde Party (I&AP) word u uitgenooi om te registreer en kommentaar te lewer oor die projek. Alle I&AP's wat geregistreer was gedurende die eerste kennisgewing periodes wat gehou was gedurende 2017-2018 vir hierdie projek, sal geregistreer bly soos die projek aanbeveel. Indien u enige kommentaar of beklommensie met betrekking tot die projek het, of indien u enige verdere inligting verlang, kan u EIMS telefonies of skriftelik kontak, teen nie later as 20 Augustus 2018 nie, met behulp van die onderstaande kontakbesonderhede. Sluit asseblief die projek verwysingsnommer (1177) in alle korrespondensie in. Verder, neem asseblief kennis dat slegs geregistreerde I&AP's in kennis gestel sal word van enige projek inligting na afloop van hierdie registrasie periode.

APPENDIX 4e
PROOF OF ADVERTISEMENTS

"THE WAY YOU APPROACH A PERSON WILL DETERMINE HOW THAT PERSON TREATS YOU." - NELSON MANDELA

• WINTERKONKOKSIES •

Winter= verkoue en griep

STREEK- Watter winterkonkoksies het jy in jou mou om verkoue en griep die winter baas te raak? Deel jou geheime met die gemeenskap... Stuur dit per e-pos na delmas@streeknuus.co.za of per WhatsApp na 0882 868 3879

Talitha van Niekerk van Sundra- Gebruik vir hoës en griep. Indien 'n persoon baie hoës, neem Vaseline en smeer die persoon se rug met Vaseline, verkieslik wit Vaseline (Vaseline maak warm, Vicks maak koud). Laat die persoon sy/ haar bors met Vaseline smeer, gaan rus en maak die persoon warm toe. Ook baie goed as die persoon sy of haar neus met Vicks smeer en selfs stukkie Vicks eet.

Hoësroep resep:

2x	Botteltjies Turlington
2x	Botteltjies Borsdruppels
1x	Botteltjie Peppermint druppels
500g	Heuning
500ml	Gemmer brandewyn
2	Eetlepels kaneel

Meng alles goed saam, en eet 'n eetlepel vol 4x per dag.

Hoes, nies en proes...
griep & verkoue...

Watter konkoksies en boerate het jy in jou mou om die winter baas te raak?

Deel jou geheime met die gemeenskap...
delmas@streeknuus.co.za

Whatsapp 082 868 3879

Ponie in haglike toestand

DELMAS- Op Sondag, 15 het personeel van die Delmas Animal Shelter 'n oproep ontvang oor 'n miniatuur ponie wat onder die mees verskriklike toestande leef.

Op ondersoek het Iede van die "Shelter" bevestig dat die klaer geensins die beskrywing van die perdjie se toestand oordryf het nie.

Sy het een van haar oë verloor. Al wat oorby is 'n leë oogkassie wat mediese behandeling moet ontvang om verdere skade of infeksie te verhoed. Verder, is haar agterhoeve amper, in die ou taal, sowat vyf duim (12 cm) lank wat amper soos dwergieskoene gelyk het.

Na onderhandelinge waar daar verskeie keuses aan die eienaar voorgelê is insluitend 'n klag van dieremishandeling, is daar besluit om die ponie onder die sorg van die Delmas Animal Shelter, te plaas.

Op Maandag het 'n hoëfsmid 'n draai by die Shelter gemaak het om die dapper diertjie 'n welverdiende "pedicure" te gee. Dit was noodsaaklik om die pyn in haar bene en lyfie te verlig.

Die personeel van die Delmas Animal Shelter wil graag hê die merrie moet weer haar sin van waardigheid vind.

Om dit te doen verg finansiële hulp van uit die gemeenskap.

Donasie kan in die volgende rekening gedeponeer word:

KENNISGEWING AANGAANDE GELEENTHEID VIR DEELNAME AAN VERSEIE OMGEWINGS LSENSIERING PROSESSE VIR DIE MBUYELO COAL MANUNGU STEENKOOPLYN IN DIE VICTOR KHANYE PLAASLIKE MUNISIPALITEIT, MPUMALANGA PROVINSIE

Kennis geskied hiermee ingevolge Hoofstuk 6 van die Omgewingsimpakstudie (EIA) Regulasies, 2014 (GN R. 982) uitgevaardig kragtens die Wet op Nasionale Omgewingsbestuur (Wet 107 van 1998) (NEMA), van aansoek vir Omgewingsmagtiging (EA) (dit wil sê: Omgewingsbepaling en Omgewingsimpakverslag (S&EIR), Geïntegreerde Watergebruiklisensie (IWUL) en Afval-besteuurslisensie (WML) vir die voorgestelde nuwe infrastruktuur en fasiliteite asook wysiging aanstoek aan die bestaande EA/EMP en IWUL, vir die Manungu steenkoolmyn.

Naam van Applikant: Tshedza Mining Resources (Pty) Ltd. (n filiaal van Mbuyelo Coal (Pty) Ltd.)
EIMS Verwysingsnommer: 1177

Bestaande Goedgekeurde Mynrege Verwysingsnommer: MP 30/5/11/2/297 MR

Beskrywing van Aktiwiteite:

Tshedza wil hul mynbewerkinge uitbrei om hul verlengde mynlewe (LoM) plan, wat gebaseer is op huidige gekwantifiseerde reserwes, te akkommodeer. Die uitbreidingsstrek buite die huidige NEMA, Wet op Nasionale Omgewingsbestuur: Afval Wet (NEMWA), en die Nasionale Waterwet (NWA) goedgekeurde areas. Alle voorgestelde myn uitbreidings aktiwiteite (bv.: oop graaf en ondergrondse mynbou, oophoo gebiede, ens) sal binne die goedgekeurde mynbou regte grens behou word, en die omgewing goedkeurings sal aansoek voorgedoen word vir verskeie mynbou-verwante aktiwiteite.

As deel van die aansoek prosesse, is Tshedza Mining Resources se voorneme om verder die lisensiering vir nuwe boorgate in te sluit vir huishoudelike verbruik, asook 'n stapelriool stelsel om die septiese tenk stelsel aan te vul en om 'n steenkoolverwerkingsfasiliteit te vestig ten einde die bestaande veredelingsfasiliteit (breek- en siftings aanleg) aan te vul. Verder, moet verskeie opsies oorweeg word om die verwagte water volumes binne die besoedelingsbeheer-dam te bestuur. As deel van die aansoek, sal verskeie wysigings aan die bestaande EA / EMP asook IWUL aangewend word ten einde die spesifieke omstandighede in lyn met die huidige status van die myn te bring, asook om sekere kondisies te verduidelik. Waar van toepassing, sal 'n Artikel 102 wysiging aansoek gedoen word in terme van die Wet op die Ontwikkeling van Minerale en Petroleumhulpbronne (Wet 28 van 2002) (MPRDA).

Plek:

Die bestaande Manungu Steenkoolmyn is geleë ongeveer 9km suid van die dorp van Delmas in Victor Khanye Plaaslike Munisipaliteit in die Nkangala Distrik Munisipaliteit, Mpumalanga Provinsie, Suid-Afrika. Die goedgekeurde mynreg (MR) bestaan uit alle gedeeltes van die plaas Wellaagte 271 IR en Welgevonden 272 IR. Die voorgestelde myn aktiwiteite sal plaasvind op gedeeltes 5, 6, 7, 8 en 9 van die plaas Wellaagte 271 IR en gedeeltes 1, 2, 3, 4, 6, 10, 11, 12, 14, 15, 17, 18, 19 en die oorblywende uitbreiding van die plaas Welgevonden 272 IR. Die ondergenoemde aktiwiteite sal almal binne die bestaande mynreg area plaasvind. Die geografiese koördinate in die middel van die perseel is ongeveer: 26°14'33.09" S en 28°41'28.22" O.

Registrasie en Kommentaar:

As 'n potensieel Belangstellende en Geaffekteerde Party (I&AP) word u uitgenooi om te registreer en kommentaar te lewer oor die projek. Alle I&AP's wat geregistreer was gedurende die eerste kennisgewing periodes wat gehou was gedurende 2017-2018 vir hierdie projek, sal geregistreer bly soos die projek aanbeweeg. Indien u enige kommentaar of bekommerings met betrekking tot die projek het, of indien u enige verdere inligting verlang, kan u EIMS telefonies of skriftelik kontak, teen nie later as 20 Augustus 2018 nie, met behulp van die onderstaande kontakbesonderhede. Sluit asseblief die projek verwysingsnommer (1177) in alle korrespondensie in. Verder, neem asseblief kennis dat slegs geregistreerde I&AP's in kennis gestel sal word van enige projek inligting na afloop van hierdie registrasie periode.

NOTIFICATION REGARDING OPPORTUNITY TO PARTICIPATE IN VARIOUS ENVIRONMENTAL LICENSING PROCESSES FOR MBUYELO COAL'S MANUNGU COLLIERY IN THE VICTOR KHANYE LOCAL MUNICIPALITY, MPUMALANGA PROVINCE

Notice is given in terms of Chapter 6 of the Environmental Impact Assessment (EIA) Regulations, 2014 (GNR.982) promulgated under the National Environmental Management Act (Act 107 of 1998) (NEMA), of applications for Environmental Authorisation (EA) (i.e.: Scoping and Environmental Impact Report (S&EIR), Integrated Water Use Licence (IWUL) and Waste Management Licence (WML) for the proposed new infrastructure and facilities as well as amendment applications to the existing EA/EMP and IWUL, on Manungu Colliery.

Name of Applicant: Tshedza Mining Resources (Pty) Ltd. (a subsidiary of Mbuyelo Coal (Pty) Ltd.)
EIMS Reference Number: 1177
Existing Approved Mining Right Reference Number: MP 30/5/11/2/297 MR

Nature of Activity:

Tshedza wishes to expand their mining activities to accommodate an extended Life of Mine (LOM) plan based on currently quantified reserves which extends mining activities outside of the current NEMA, National Environmental Management Waste Act (NEMWA), and National Water Act (NWA) approved areas. All proposed mine expansion activities (e.g.: opencast and underground mining, stockpile areas, etc.) will be contained within the approved mining right boundary, and environmental approvals will be sought for various mining related activities.

As part of the application processes, Tshedza further intends to include the licencing of new boreholes for domestic consumption, a french drain system to complement the septic tank system and establish a coal processing facility (wash plant) in order to complement the existing beneficiation facility (crushing and screening plant). Furthermore, various options are to be considered to manage expected water volumes within the pollution control dam. As part of this application, various amendments to the existing EA/EMP as well as IWUL will also be applied for in order to align the specific conditions with the current status of the mine as well as to clarify certain conditions. Where relevant, a Section 102 amendment application will be undertaken in terms of the Mineral and Petroleum Resources Development Act (Act 28 of 2002).

Location:

The existing Manungu Colliery is located approximately 9km south of the town of Delmas in Victor Khanye Local Municipality, within the Nkangala District Municipality, Mpumalanga Province, South Africa. The approved mining right (MR) comprises of all portions of the farms Wellaagte 271 IR and Welgevonden 272 IR. The proposed mining activities will occur on portions 5, 6, 7, 8 and 9 of the farm Wellaagte 271 IR and portions 1, 2, 3, 4, 6, 10, 11, 12, 14, 16, 17, 18, 19 and the remaining extent of the farm Welgevonden 272 IR. The below-mentioned activities will all occur within the existing mining right area. The geographic coordinates at the center of the site are approximately: 26°14'33.09" S and 28°41'28.22" E.

Registration and Comment:

As a potential Interested and Affected Party (I&AP), you are invited to register and comment on the project. All I&AP's whom have registered during the initial notification periods held during 2017-2018 for this project will remain registered moving forward. Should you have any comments or concerns regarding the project, or should you require any additional information, please contact EIMS telephonically, or in writing by no later than the 20th August 2018, using the contact details below. Please include the project reference number (1177) in all correspondence. Furthermore, please note that only registered I&AP's will be informed of any project information post this registration period.
